Name: ______________________

Worksheet

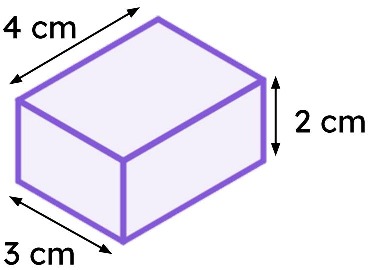
Volume of prisms

Task A: Calculating the volume of any prism

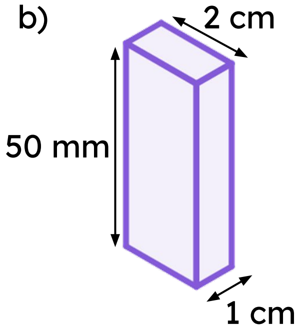
1) Sketch all the cuboids with integer lengths, that have a volume of 18 cm^3

2) Calculate the volume of these cuboids

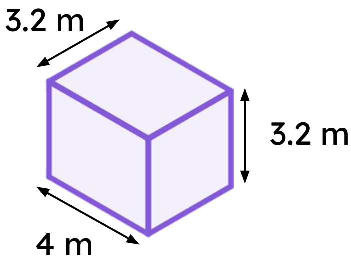
a)



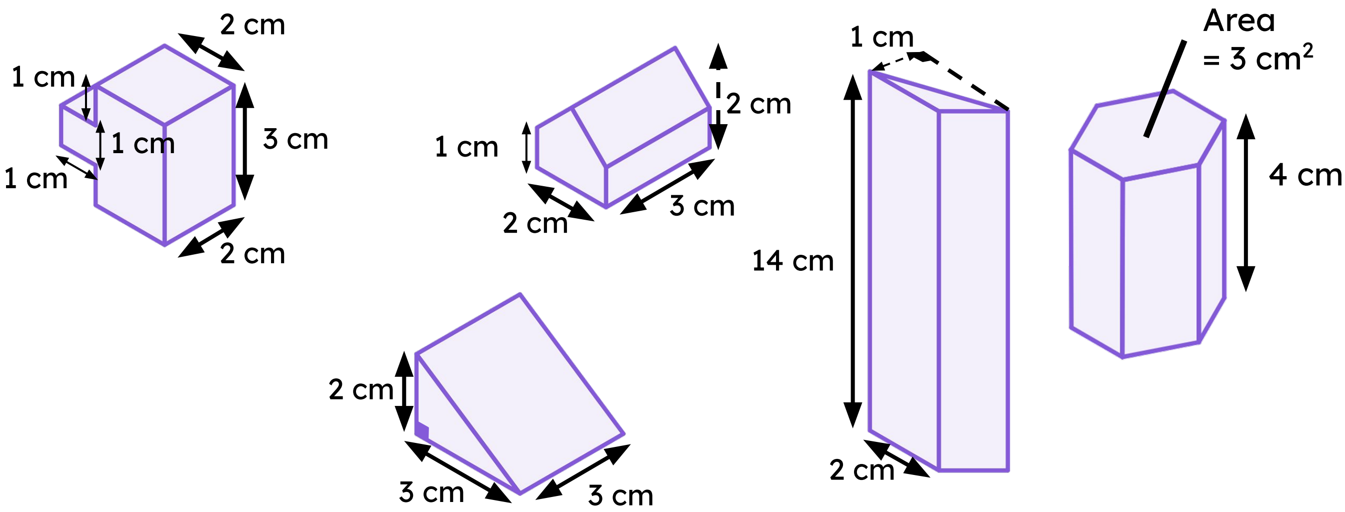
b)



c)

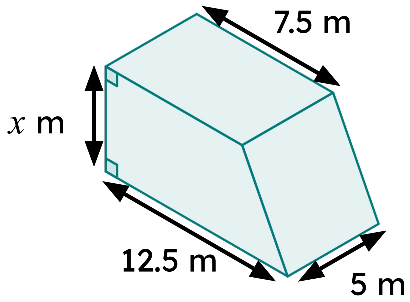


3) There are pairs of shapes with the same volume. Which shape does not have a pair?



Task B: Using the volume of a prism

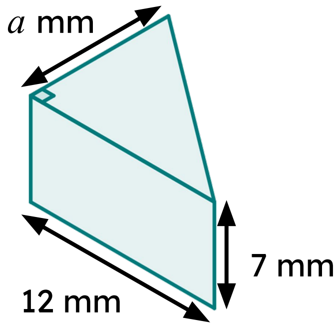
1) Complete the missing parts of the calculation.

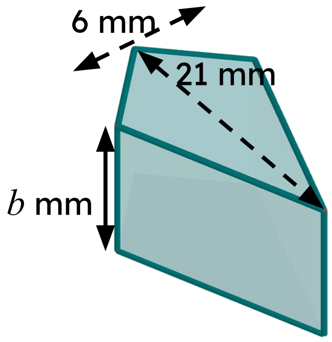


Volume = 300 m^3

$$\left(\frac{1}{2} \times (12.5 + \_\_\_\_) \times x\right) \times 5 = 300$$
$$\left(\frac{1}{2} \times \_\_\_\_ \times x\right) \times 5 = 300$$
$$10x = \_\_\_\_$$
$$x = \_\_\_\_$$

2) Both prisms have a volume of 378 mm^3. Work out the missing length in each prism.





3) Prism A and prism B have the same volume. Work out the missing length of prism B.
