Plotting coordinates generated from a rule using technology

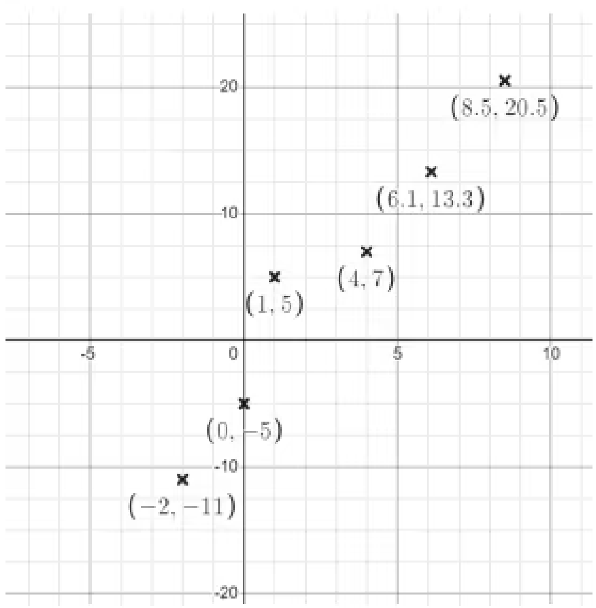
1 What is the coordinate of the origin? Fill in the blank

____

2 Plot these 4 coordinates on Desmos. What shape do they form?
$(2.5, -4)$ $(7, -2.2)$ $(10.6, -11.2)$ $(6.1, -13)$ Tick **1** correct answer

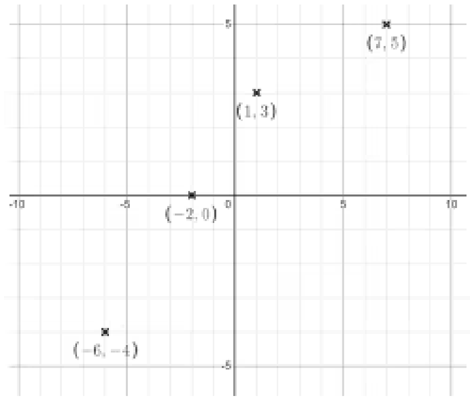
- ☐ square
- ☐ rectangle
- ☐ rhombus
- ☐ kite

3 Write down the coordinate which does not follow the same rule as the others on this graph. The coordinate pairs are: $(-2, -11)$ $(0, -5)$ $(1, 5)$ $(4, 7)$ $(6.1, 13.3)$ $(8.5, 20.5)$
Fill in the blank



____

4 Aisha has plotted these 4 coordinates. Why do they not lie on a straight line?
$(1, 3)$ $(7, 5)$ $(-6, -4)$ $(-2, 0)$ Tick **1** correct answer



- [ ] They do not follow the same rule.
- [ ] They do not have the same x coordinate.
- [ ] She has plotted them wrong.
- [ ] They do not have the same y coordinate.
- [ ] The y axis has been stretched .

5 What is the rule which links the coordinates: $(6, 14)$ $(-2, -18)$ $(-5, -30)$ $(-11, -54)$? Plot the coordinates and the lines in Desmos to help you. Tick **1** correct answer

- [ ] $y = 3x - 4$
- [ ] $y = -2x + 8$
- [ ] $y = 4x - 10$
- [ ] $y = 5x + 1$

6 These three coordinates are plotted: $(3, 5)$ $(5, 9)$ $(9, 7)$. What are the coordinates of the 4th point needed to form a square? Plot them on Desmos to help you. Fill in the blank

____
