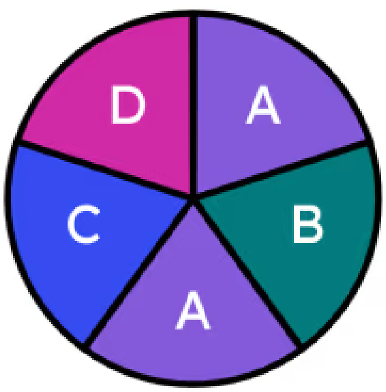
Using an outcome tree to display outcomes for two events

1 Which of these are equivalent to $\frac{1}{5}$? Tick **3** correct answers

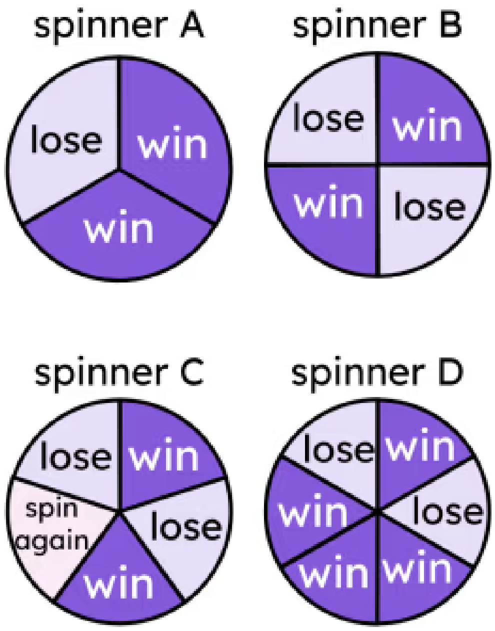
- ✓ $\frac{2}{10}$
- ☐ $\frac{6}{10}$
- ☐ 0.5
- ✓ 0.2
- ✓ 20%

2 Andeep carries out the following trial: spinning this spinner once. Which of these is the sample space of distinct outcomes for Andeep's trial? Tick **1** correct answer



- ☐ There are 5 sectors.
- ☐ There are 4 distinct outcomes.
- ☐ {A, A, B, C, D}
- ✓ {A, B, C, D}
- ☐ {A, A} is the repeated outcome.

3 Each sector in a spinner is of equal size. In which spinners are the outcomes of “win” and “lose” equally likely? Tick **2** correct answers

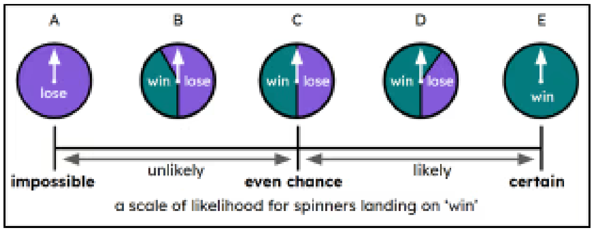


- [ ] A
- [x] B
- [x] C
- [ ] D

4 A fair, 6-sided dice has outcomes: {2, 3, 4, 5, 6, 7}. Which of these events is most likely to happen? Tick **1** correct answer

- [ ] multiple of 2
- [ ] multiple of 3
- [ ] even number
- [x] prime number
- [ ] square number

5 A fair 6-sided dice has outcomes: {1, 2, 3, 4, 5, 6}. Event: if the dice lands on a prime number, Aisha wins. Which of these outcome spinners most closely represents the likelihood of Aisha winning? Tick **1** correct answer



- [ ] A
- [ ] B
- [x] C ✓
- [ ] D
- [ ] E

6 Trial: a spinner will be spun twice. The outcome of each spin will be multiplied together. The spinner has outcomes: {2, 5, 7, 11, 15}. Match the letters to their correct value in the outcome table. Write the correct letter in each box

×	2	5	7	11	15
	4	D		22	
E					
7					
B		55		C	
15	A				

a	A
b	B
c	C
d	D
e	E

c	121
a	30
d	10
b	11
e	5
