Justifying terms of a sequence

1 The sequence 37, 47, 57, 67, 77, … could be described as which? Tick **3** correct answers

- [ ] Linear
- [ ] Non-linear
- [ ] Arithmetic
- [ ] Increasing
- [ ] Decreasing

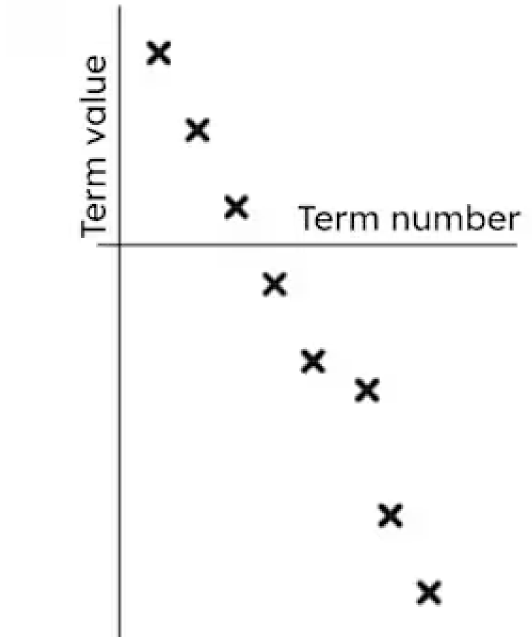
2 Which of the below statements supports the justification that 6941 is not in the arithmetic sequence starting 14, 19, 24, 29, 34, …? Tick **2** correct answers

- [ ] It's too large a number.
- [ ] 14, 19, 24, 29, 34, … is a translation of a $5n$ sequence.
- [ ] The sequence will always end in the digit 4 or 9 in the ones position.
- [ ] 6941 is an odd number, and the sequence begins with an even number.

3 Which of the below will be common terms in the sequences $2n + 24$ and $5n + 13$? Tick **3** correct answers

- [ ] 13 048
- [ ] 103
- [ ] 888
- [ ] 1001
- [ ] 8008

4 The first 8 terms of a sequence are plotted. Which term is incorrect in the plotting of this arithmetic sequence? Tick **1** correct answer

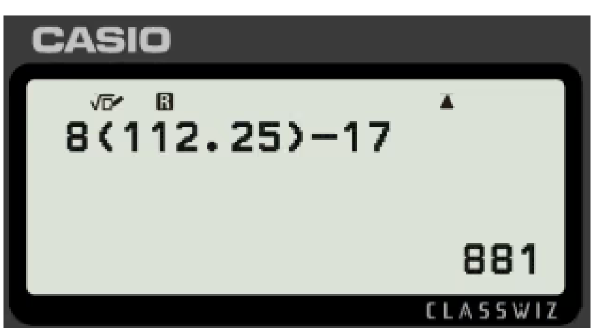


- [ ] The 2^{nd} term
- [ ] The 4^{th} term
- [ ] The 6^{th} term
- [ ] The 8^{th} term

5 Which of the below is a useful estimation to start with when trying to find 315 in the sequence $6\text{n} - 9$? Tick **1** correct answer

- [ ] $\text{n} = 25$
- [ ] $\text{n} = 50$
- [ ] $\text{n} = 100$
- [ ] $\text{n} = 300$
- [ ] $\text{n} = 600$

6 What does this calculator display tell us? Tick **2** correct answers



- [ ] 881 is in the sequence $8\text{n} - 17$
- [ ] 881 is not in the sequence $8\text{n} - 17$
- [ ] 881 is the 112.25^{th} term.
- [ ] 881 is not a term because 112.25 is not a whole number.
