Further demonstrating of Pythagoras' theorem

1 What is the missing side length of a right-angled triangle with legs of size 3 and 4 units?

5

2 What is the missing side length of a right-angled triangle with legs of size 6 and 8 units?

10

3 What is the missing side length of a right-angled triangle with hypotenuse 13 units, and a shorter side of length 5 units?

12 units

4 What is the area of a right angled triangle with hypotenuse of length 25 units, and base of length 7 units?

84

5 The lengths of sides of different triangles are provided below. Which ones are right angled triangles? (Tick **3** correct answers)

- [x] 3, 4, 5
- [x] 119, 120, 169
- [x] 44, 117, 125
- [ ] 50, 78, 80

6 What is the size of the hypotenuse for a right-angled isosceles triangle with legs of 4 units? (Tick **1** correct answer)

- [x] $\sqrt{32}$
- [ ] 32
- [ ] 16
- [ ] 4
- [ ] 6
