Worksheet

Checking understanding of rounding

Task A: Rounding to 10, 100 & 1000

1) Find the incorrect statement in each row.
Record the letter. When you have all 7, rearrange them into a word.

Rounded to nearest						
10	82 ≈ 80	A	65 ≈ 60	Y	27 ≈ 30	E
1000	7459 ≈ 8000	U	2084 ≈ 2000	S	3980 ≈ 4000	N
1000	17 856 ≈ 18 000	T	24 068 ≈ 24 000	P	97 254 ≈ 98 000	R
10	793 ≈ 800	L	425 ≈ 430	K	185 ≈ 190	M
10	1576 ≈ 1580	D	8924 ≈ 8900	O	3906 ≈ 3910	V
100	29 856 ≈ 29 900	E	58 501 ≈ 59 000	H	70 398 ≈ 70 400	U
1000	783 010 ≈ 783 000	F	1 809 421 ≈ 1 809 000	I	470 498 ≈ 471 000	G

The hidden word is roughly.

Task B: Rounding to the nearest whole number

In this task you need to **round** all numbers to the nearest whole number. The first one has been done for you.

Across
1) 318.29
4) 4907.66
5) 61.9
7) 265.49
9) 96.35
10) 391.5

Down
1) 305.51
2) 83.7
3) 1005.74
6) 2860.49
7) 213.4
8) 551.503

[1] 3	1	[2] 8		[3] 1	
0		[4] 4	9	0	8
[5] 6	[6] 2			0	
	8		[7] 2	6	[8] 5
[9] 9	6		1		5
	0		[10] 3	9	2

Task C: Rounding to one or two decimal places

1) **Round** each of the following to one decimal place (1 d.p.)

a) 3.23 = *3.2* (1 d.p.)

b) 3.38 = *3.4* (1 d.p.)

c) 13.75 = *13.8* (1 d.p.)

d) 13.72 = *13.7* (1 d.p.)

e) 134.51 = *134.5* (1 d.p.)

f) 134.98 = *135.0* (1 d.p.)

g) 2345.03 = *2345.0* (1 d.p.)

2) **Round** each of the following to two decimal places (2 d.p.)

a) 4.358 = *4.36* (2 d.p.)

b) 4.352 = *4.35* (2 d.p.)

c) 24.7531 = *24.75* (2 d.p.)

d) 24.75251 = *24.75* (2 d.p.)

e) 224.90753 = *224.91* (2 d.p.)

f) 224.09753 = *224.10* (2 d.p.)

g) 5224.09931 = *5224.10* (2 d.p.)

3	4	5	6	7

3) Using all five digits each time, rearrange the cards in the place value grid to create (and if it's not possible, explain why):

a) A number that **rounds** to 4 000 to the nearest thousand.

e.g.

TTh	Th	H	T	O •	Tth	Hth
	3	7	5	6 •	4	

b) A number that **rounds** to 300 to the nearest hundred.

e.g.

TTh	Th	H	T	O •	Tth	Hth
		3	4	5 •	6	7

c) A number that **rounds** to 10 to the nearest ten.

e.g.

TTh	Th	H	T	O •	Tth	Hth
				6 •	4	3

5 7

d) A number that **rounds** to 10 to the nearest whole number.

TTh	Th	H	T	O •	Tth	Hth
				•		

Impossible as there is not a 9, 1,or 0 card.

e) A number that **rounds** to 3.8 to the nearest tenth.

e.g.

TTh	Th	H	T	O .	Tth	Hth
				3 .	7	6

5 4

f) Which part has the most possible answers?

Part c has the most possible answers as there are 3 different starting points.

g) Which part has the fewest possible answers?

Part d has the least as it is impossible.
