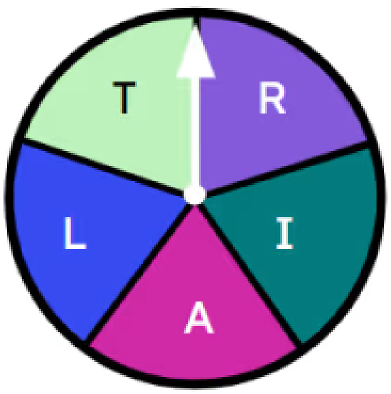
Calculating theoretical probabilities from Venn diagrams (one event)

1 What is the probability that this spinner will land on either L or T? Tick **1** correct answer



- [x] 0.4
- [ ] 0.2
- [ ] 0.6

2 A coin is flipped twice. How many possible outcomes will be in the sample space? Tick **1** correct answer

- [ ] 2
- [x] 4
- [ ] 3

3 If the probability of an event (A) is 1/6, and the experiment is repeated 78 times, what is the theoretical number of times (A) will occur? Tick **1** correct answer

- [x] 13
- [ ] 6
- [ ] 36
- [ ] 18

4 In a bag with 5 red counters and 3 green counters, what is the probability of randomly selecting a red counter? Tick **1** correct answer

- [ ] /frac53
- [x] /frac58
- [ ] /frac25

5 In a bag with 5 red counters, 2 blue counters and 3 green counters, what is the probability of randomly selecting a blue counter? Tick **1** correct answer

- [x] /frac15
- [ ] /frac29
- [ ] /frac710

6 In a fair six-sided die, what is the probability (as a decimal) of rolling an even number and getting a head in a single toss of a fair coin? Fill in the blank

0.25
