Starter quiz

Choosing an appropriate method for finding lengths of a triangle

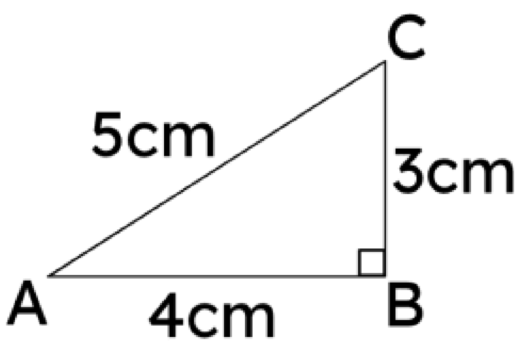
1 In a right triangle, if the hypotenuse is 40 cm and a second side is 32 cm, what is the length of the third side? (Use a calculator to help you.) Tick **1** correct answer

- [ ] 24 cm
- [ ] 26 cm
- [ ] 22 cm

2 In a right triangle, if the shortest sides are 10 cm and 7.5 cm, what is the length of the hypotenuse? (Use a calculator to help you.) Tick **1** correct answer

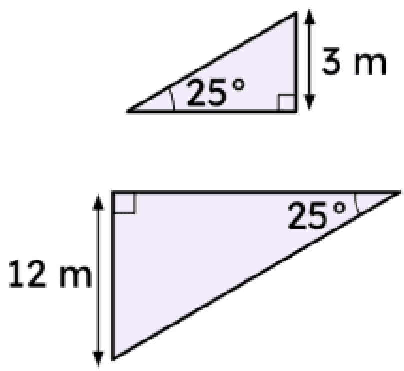
- [ ] 12.5 cm
- [ ] 11.5 cm
- [ ] 13.5 cm

3 Would a triangle ABC with sides AB = 9cm, BC = 7.5cm, AC = 12.5cm be similar to the one shown in the diagram? Tick **1** correct answer



- [ ] Yes
- [ ] No

4 For this pair of triangles, can you determine whether they are similar without using side lengths? Tick **1** correct answer



- [ ] Yes, because their three angles correspond.
- [ ] No because you only know two angles.
- [ ] No, because you always need a side and two angles.

5 In a right triangle, if the hypotenuse is 200 cm and a second side is 120 cm, what is the perimeter? (Use a calculator to help you.) Tick **1** correct answer

- [ ] 470 cm
- [ ] 492 cm
- [ ] 480 cm

6 In a right triangle, if the hypotenuse is 30 cm and a second side is 18 cm, what is the area? (Use a calculator to help you.) Tick **1** correct answer

- [ ] 512cm^2
- [ ] 216cm^2
- [ ] 1028cm^2
