Representing geometric sequences graphically

1 This graph of n (term number) against T (term value) could represent which of these types of sequences? Tick **1** correct answer

- [ ] linear
- [ ] geometric
- [ ] arithmetic
- [ ] additive

2 Jacob plots the graph of this geometric sequence. Which coordinates should Jacob plot? Tick **2** correct answers

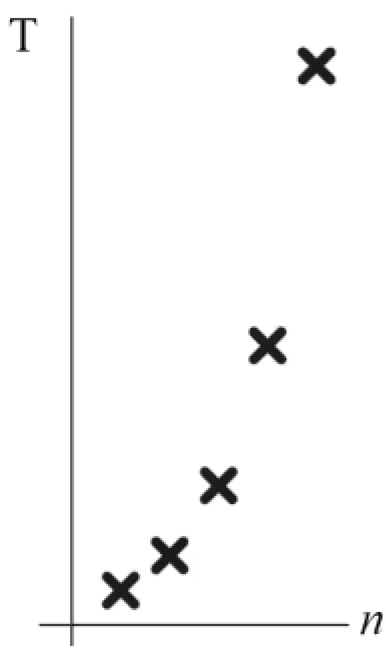
n	1st	2nd	3rd	4th	5th
T	6	30	150	750	3750

- [ ] (30, 150)
- [ ] (30, 2)
- [ ] (2, 30)
- [ ] (750, 4)
- [ ] (4, 750)

3 How do you know that this graph might represent a geometric sequence? Tick **1** correct answer

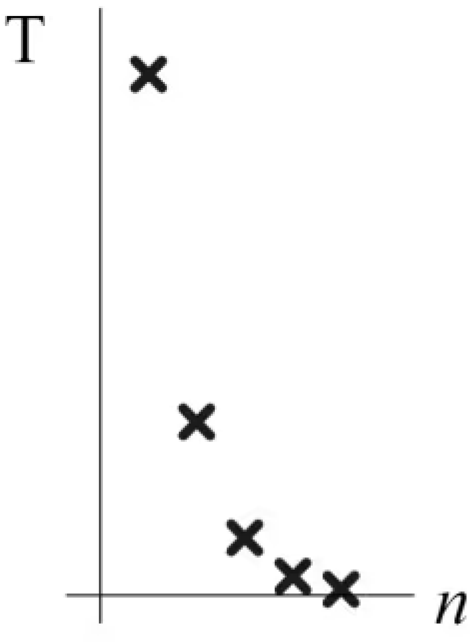
- [ ] The points form a straight line.
- [ ] The graph is increasing.
- [ ] The terms are all positive.
- [ ] The points form a curve.

4 What do you know about the common ratio of this geometric sequence? Tick **1** correct answer



- [ ] It is positive.
- [ ] It is negative.
- [ ] It is large.
- [ ] It is less than 1.
- [ ] It is greater than 1.

5 Which of the below could be the ratio of this geometric sequence? Tick **2** correct answers



☐ -4

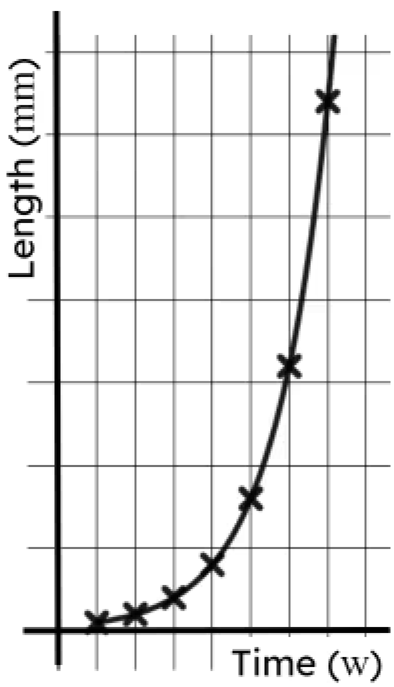
☐ $\frac{1}{4}$

☐ 0.4

☐ 2.5

☐ $\frac{5}{4}$

6 You can draw a line through the points of this geometric sequence because it is modelling data that is … Tick **1** correct answer



☐ constant

☐ continuous

☐ discrete

☐ rapidly increasing

☐ unknown
