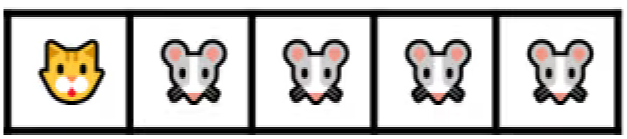
Expressing multiplicative relationships as ratios and fractions

1 Which are equivalent to this ratio? Tick **2** correct answers

- [x] For every 1 t-shirt, there is 1 pair of shorts.
- [ ] For every 1 t-shirt, there are 2 pairs of shorts.
- [x] Number of pairs of shorts × 1 = Number of t-shirts
- [ ] Number of pairs of shorts × 0.5 = Number of t-shirts

2 Which are equivalent to this ratio? Tick **3** correct answers



- [x] For every cat, there are 4 mice.
- [ ] For every 2 cats, there are 9 mice.
- [x] For every 2 cats, there are 8 mice.
- [x] Number of cats × 4 = Number of mice
- [ ] Number of cats × 5 = Number of mice

3 Which are equivalent to this ratio? Tick **3** correct answers

☐ For every 4 phones, there are 3 houses.

☑ For every 4 houses, there are 3 phones.

☑ Number of houses $\times \frac{3}{4} =$ Number of phones

☐ Number of phones $\times \frac{3}{4} =$ Number of houses

☑ Number of phones $\times \frac{4}{3} =$ Number of houses

4 A quantity is divided into two parts: A and B. Match each ratio with the correct fraction. Write the correct letter in each box

a	For every 2 As, there are 3 Bs
b	For every 2 As, there are 5 Bs
c	For every 2 As, there are 2 Bs
d	For every 1 As, there are 2 Bs

a	Fraction of A is $\frac{2}{5}$
b	Fraction of A is $\frac{2}{7}$
c	Fraction of A is $\frac{1}{2}$
d	Fraction of A is $\frac{1}{3}$

5 A quantity is divided into two parts: A and B. Match each ratio with the correct formula. Write the correct letter in each box

a	For every 2 As, there are 3 Bs.
b	For every 2 As, there are 5 Bs.
c	For every 2 As, there are 2 Bs.
d	For every 1 As, there are 2 Bs.

b	$A \times \frac{5}{2} = B$
c	$A \times 1 = B$
a	$A \times \frac{3}{2} = B$
d	$A \times 2 = B$

6 A quantity is divided into two parts: A and B. Match each fraction with the correct formula to find B. Write the correct letter in each box

a	A is $\frac{2}{3}$
b	A is $\frac{3}{5}$
c	A is $\frac{4}{7}$
d	A is $\frac{1}{3}$

d	$A \times 2 = B$
c	$A \times \frac{3}{4} = B$
b	$A \times \frac{2}{3} = B$
a	$A \times \frac{1}{2} = B$
