Interpreting pie charts

1 The table shows the number of people at Location 1 and their preferred cooking style for potatoes. By choosing an appropriate row to perform calculations on, find the value of the unknown multiplier. Tick **1** correct answer

Location 1	frequency	angle
roasted	40	
mashed	67	
boiled	13	39
total		360

unknown multiplier

- [ ] 40
- [ ] 9
- [x] 3
- [ ] 13
- [ ] 39

2 The table shows the number of people at Location 2 and their preferred cooking style for potatoes. Find the multiplier linking frequency and angle. Fill in the blank

Location 2	frequency	angle
roasted		126
mashed	81	162
boiled		72
total		360

unknown multiplier

2

3 Find the number of people who preferred boiled potatoes. Fill in the blank

Location 2	frequency	angle
roasted		126
mashed	81	162
boiled		72
total		360

unknown multiplier

36

4 Match the missing number (labelled by a letter) in the ratio table with its correct value. Write the correct letter in each box

$\div a$

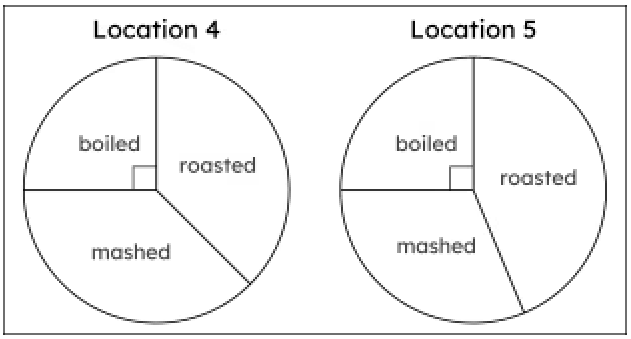
Location 3	frequency	angle
roasted	40	160
mashed	32	b
boiled	d	c
total	e	360

$\times a$

a	a
b	b
c	c
d	d
e	e

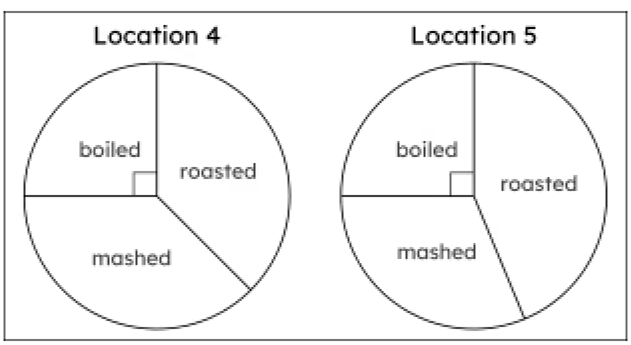
e	90
c	72
a	4
d	18
b	128

5 Below are correctly drawn pie charts showing the preferred cooking methods for potatoes for people at Locations 4 and 5. Select the statements that are always true. Tick **2** correct answers



- [ ] The same number of people (25 people) voted for boiled at both Locations 4 and 5
- [x] The same percentage of people (25%) voted for boiled at both Locations 4 and 5
- [ ] A greater number of people voted for roasted in Location 5 than Location 4
- [x] A greater proportion of people voted for roasted in Location 5 than Location 4
- [ ] The same number of people voted in Locations 4 and 5

6 75 people voted for roasted in Location 4. By using a protractor and this information, calculate the total frequency of the people who voted in Location 4. Fill in the blank



200
