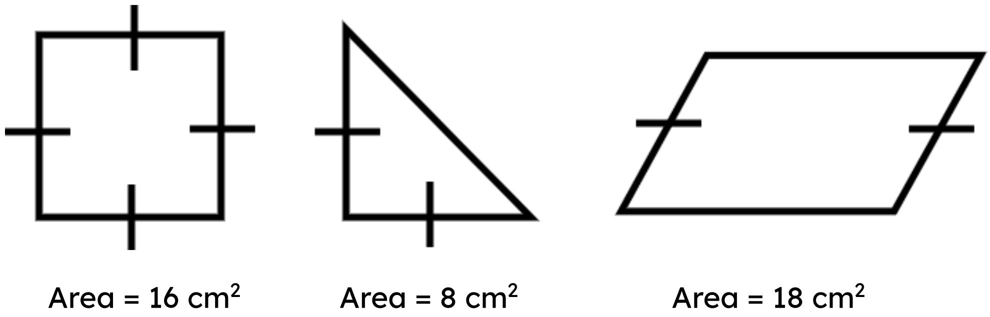
Name: ____________________

Worksheet

Area of a trapezium

Task A: Building an area

1) State how many of each shape should be used to create a composite shape with the stated area.

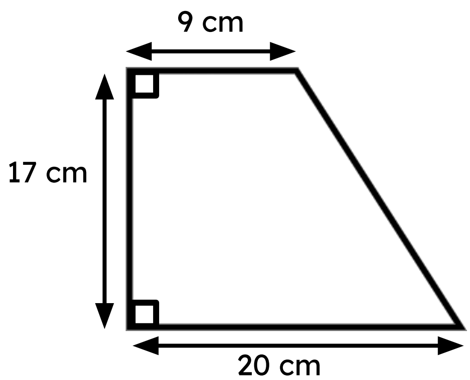


a) Area = 24 cm^2 b) Area = 50 cm^2 c) Area = 60 cm^2

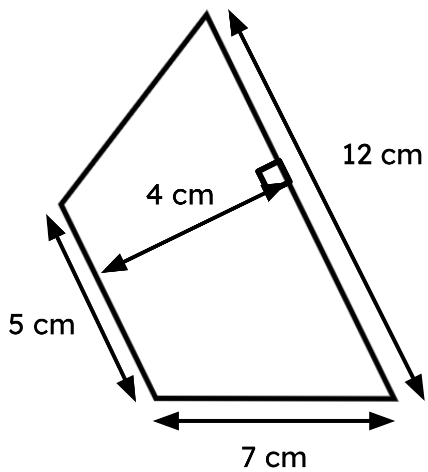
Task B: Area of a trapezium via composite shapes

1) Calculate the area of each **trapezium**.

a)



b)



Task C: Formula for the area of any trapezium

1) Instructions:

- Take a piece of paper and fold it in half.
- Draw a **trapezium** on your piece of folded paper (try to make it different from mine).
- Cut out your **trapezium**. You should have two identical **trapeziums** due to your folded paper.
- Rotate one **trapezium** by half a turn. Place the two **trapeziums** next to each other.

Which quadrilateral did you make?
