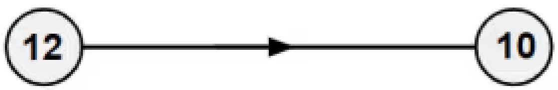
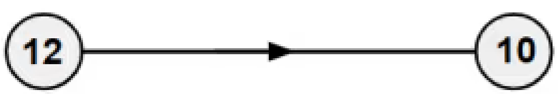
Multiplicative relationships

1 Only using one step, what is the additive relationship for the connection of these numbers? Tick **1** correct answer



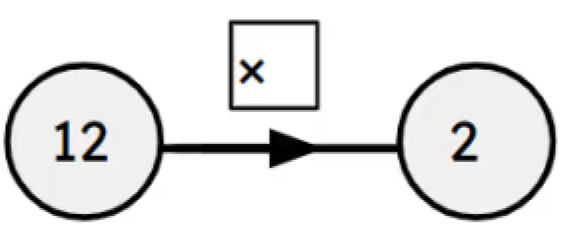
- [ ] add 2
- [x] add (-2)
- [ ] add $\frac{1}{2}$

2 What two steps can be applied here for the connection of these numbers? Tick **4** correct answers



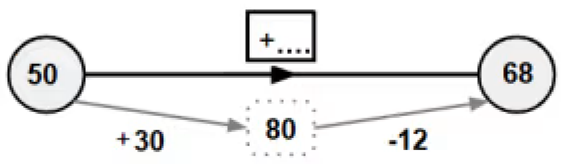
- [x] subtract 10 then add 8
- [x] add (-10) then add 8
- [x] divide by 6 then multiply by 5
- [x] add 8 then subtract 10
- [ ] divide by 5 then multiply by 6

3 Using the function machine, what is the multiplicative relationship between the numbers? Tick **1** correct answer



- [ ] There is none as it is division not multiplication
- [ ] Multiply by 6
- [ ] Add 6
- [x] Multiply by $\frac{1}{6}$
- [ ] Subtract 6

4 What is the single additive step that connects these numbers? Tick **1** correct answer



- [x] add 18
- [ ] add (-18)
- [ ] add 42
- [ ] add (-42)

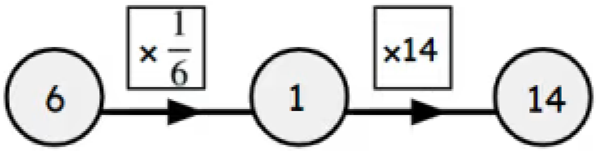
5 Using the values in the table, match the following. Write the correct letter in each box

A	B
8	12

a	The additive step from A to B
b	The additive step from B to A
c	The multiplier from A to B
d	The multiplier from B to A

c	$\frac{3}{2}$
b	(-4)
d	$\frac{2}{3}$
a	4

6 What is the single multiplier? Tick **1** correct answer



- [x] $\frac{7}{3}$
- [ ] $\frac{6}{14}$
- [ ] $\frac{3}{7}$
- [ ] 2.5
