

Name: _____

Dividing a whole number by a fraction

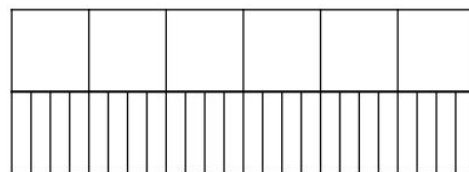

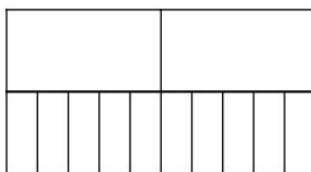

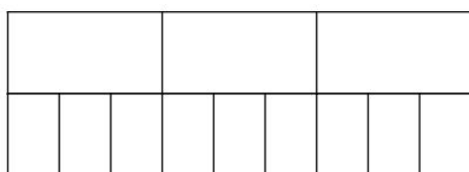

Task A: Making sense of dividing by a fraction

1) Use the bar models to show the division of the following.

a) $3 \div \frac{1}{3}$

b) $2 \div \frac{2}{5}$

c) $6 \div \frac{3}{4}$

2) Match the question with the calculation and the answer.

$4 \div \frac{2}{3}$

$\frac{48}{4} \div \frac{3}{4}$

12

$6 \div \frac{3}{4}$

$\frac{12}{3} \div \frac{2}{3}$

16

$12 \div \frac{3}{4}$

$\frac{24}{3} \div \frac{2}{3}$

8

$8 \div \frac{2}{3}$

$\frac{24}{4} \div \frac{3}{4}$

6

3) Circle the following divisions which give an answer of four.

$3 \div \frac{3}{4}$

$5 \div \frac{4}{5}$

$4 \div \frac{2}{5}$

$4 \div \frac{4}{4}$

$12 \div \frac{2}{3}$

$12 \div \frac{3}{1}$

$8 \div \frac{1}{4}$

4) Put the following in ascending order, smallest to largest.

$$3 \div \frac{1}{10}$$

$$10 \div \frac{2}{5}$$

$$3 \div \frac{1}{4}$$

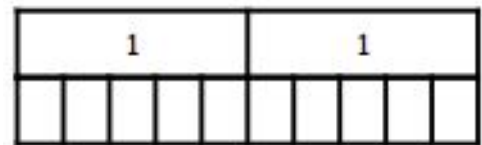

$$10 \div \frac{2}{3}$$

5) Create three of your own questions which, when dividing an integer by a proper fraction, give the answer of 10.

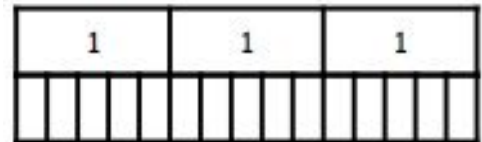

Task B: Deepening understanding of dividing by a fraction

1) Using the bar models, work out the answers to the following:

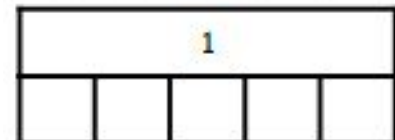

a) $2 \div \frac{3}{5}$

b) $3 \div \frac{4}{5}$

c) $1 \div \frac{2}{5}$

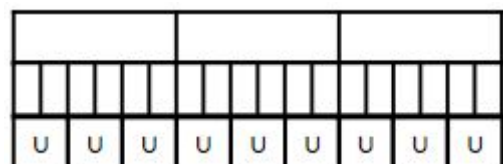

2) Izzy and Laura have done the following bar models for a question $3 \div \frac{2}{7}$

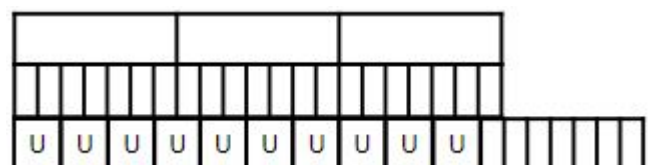

Both have made an error with their bar model.

a) Explain where they have made their mistake.

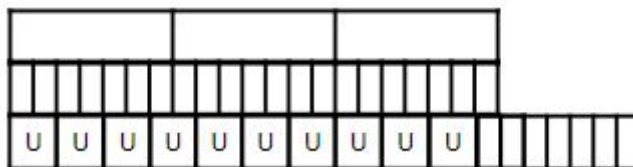

Izzy "The answer is 9"

Laura "The answer is $10\frac{1}{7}$ "

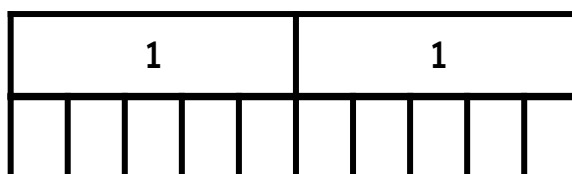

b) Amend a bar model to help work out the correct answer.

3) Using squared paper, draw your own bar models to work out the answers to

a) $5 \div \frac{2}{3} =$

b) $7 \div \frac{3}{4} =$

c) $5 \div \frac{3}{5} =$
