

Name: _____

Starter quiz

Dividing a fraction by a fraction

1 Using a bar model or otherwise, complete the statement $6 \div \frac{2}{5} =$ _____
. Fill in the blank

2 Using a bar model or otherwise, complete the statement $10 \div \frac{2}{3} =$ _____
. Fill in the blank

3 Without using a bar model, which calculation is the most efficient calculation to work out $8 \div \frac{2}{5}$? Tick **1** correct answer

☐ $\frac{16}{2} \div \frac{2}{5}$

☐ $\frac{24}{3} \div \frac{2}{5}$

☐ $\frac{400}{50} \div \frac{2}{5}$

☐ $\frac{40}{5} \div \frac{2}{5}$

- 4 Using a model or otherwise, work out the answer for $5 \div \frac{2}{7}$. Tick **1** correct answer

☐ $15\frac{2}{7}$

☐ $17\frac{2}{7}$

☐ $16\frac{1}{2}$

☐ $17\frac{1}{2}$

☐ $17\frac{3}{4}$

- 5 Here is a bar model. Three of the Oak students think they know what the question was. Which student is correct? Tick **1** correct answer

☐ Sam says " It is $6 \div \frac{3}{4}$ "

☐ Aisha says " It is $6 \div \frac{2}{3}$ "

☐ Laura says " It is $6 \div \frac{3}{5}$ "

☐ Sofia says " It is $6 \div \frac{2}{5}$ "

- 6 Order the following from largest to smallest. Drawing bar models to find the mixed number may help. Use numbers to show the correct order

	$5 \div \frac{5}{3}$
	$4 \div \frac{4}{5}$
	$4 \div \frac{3}{4}$
	$2 \div \frac{2}{11}$
	$10 \div \frac{3}{5}$
