

Priority of operations with positive and negative integers, decimals and fractions

- 1 Using the priority of operations, which operations come before multiplication and division? Tick **3** correct answers

- ☒ Brackets
- ☒ Roots
- ☒ Exponents
- ☐ Addition
- ☐ Subtraction or the addition of the additive inverse

- 2 Match the calculations on the left with the correct answer on the right. Write the correct letter in each box

a	$3 + 4 \times 5$
b	$4 + 3 \times 5$
c	$3 + 6 \div 2$
d	$2 + 4 \times 5 + 5 \times 1$

<i>b</i>	19
<i>d</i>	27
<i>c</i>	6
<i>a</i>	23

- 3 The priority of operations applies to: Tick **1** correct answer

- ☐ positive and negative integers only
- ☒ positive and negative integers, fractions and decimals
- ☐ positive numbers only

- 4 Look at the calculation using the priority of operations. Write what number is represented by the star. Fill in the blank

$$\star - 8 \times 3 + 5^2 - \sqrt{25}$$

$$\star - 8 \times 3 + 25 - 5$$

$$\star - \star + 25 - 5$$

$$\star + (-\star + 25 + (-5))$$

$$\star + 25 + (-5) + (-\star)$$

$$49 + (-29) = 20$$

24

- 5 Using your knowledge on the addition of fractions, work out the answer to

$$\frac{11}{12} + \left(-\frac{1}{3}\right) + \frac{1}{4}. \text{ Tick 1 correct answer}$$

☐ $\frac{13}{13}$

☒ $\frac{5}{6}$

☐ 1

☐ $\frac{6}{5}$

6 Using your knowledge on the addition of fractions and additive inverses, work out the answer to $\frac{9}{10} + (-\frac{1}{5}) + \frac{7}{20} + (-\frac{3}{10})$. Tick **1** correct answer

☐ $\frac{4}{5}$

☒ $\frac{3}{4}$

☐ $\frac{12}{15}$

☐ $\frac{11}{12}$
