

Name: _____

Checking understanding of arithmetic procedures with integers and decimals

Task A: Arithmetic procedures with integers

1) Find the missing digits in each of the following:

a)
$$\begin{array}{r} \square 46 \\ + 39\square \\ \hline 5\square 0 \end{array}$$

b)
$$\begin{array}{r} 73\square \\ - 3\square 7 \\ \hline \square 48 \end{array}$$

c)
$$\begin{array}{r} 4\square 25 \\ + \square 0\square 2 \\ \hline \square 071\square \end{array}$$

d)
$$\begin{array}{r} \square 41\square \\ - 4\square 25 \\ \hline 20\square 3 \end{array}$$

2) Calculate the following, without a calculator. Try to use the efficient methods we have talked about.

- a) 580×5
- b) 87×4
- c) 26×8
- d) 45×6
- e) $485 \div 5$

Task B: Addition and subtraction of decimals

- 1) Sofia and Andeep record how far they kick a football.
- a) What is the total distance?
 - b) Much much further did Sofia kick the ball?

I kicked it 12.73 metres.

I kicked it 9.8 metres.

2) Lucas, Aisha and Jun record how long they can bounce a basketball for.

- a) What is the total time?
b) How much longer did Lucas manage than Jun?

I did 35.6 seconds.

I did 28.45 seconds.

And, I managed 27.87 seconds.

3) Here are three slightly different subtractions.

$$\begin{array}{r} 37.4 \\ - 2\triangle.3 \\ \hline \star 0.\square \end{array}$$

$$\begin{array}{r} 37.4 \\ - 2\triangle.5 \\ \hline \star 0.\square \end{array}$$

$$\begin{array}{r} 37.4 \\ - 2\bigcirc.5 \\ \hline \star 8.\square \end{array}$$

Without calculating, explain why the following statements are false.

- a) The digit in the $\square$ must be 1 in each calculation as the tenths digits are one apart.
b) The digit in the $\triangle$ must be 7 in both cases as the difference is 0.
c) The digit in the $\star$ must be 1 in all three calculations as $3 - 2 = 1$. Find the missing digits.

Task C: Multiplication and division of decimals

1) Match the operation on the left to its equivalent on the right.

$\times 5$

$\times 2 \times 2 \times 2$

$\div 4$

$\div 2 \div 2$

$\times 8$

$\div 2 \div 3$

$\div 5$

$\times 10 \div 2$

$\div 6$

$\times 2 \times 3$

$\times 6$

$\div 10 \times 2$

2) Find the cost of the following:

- a) 2 boxes
- b) 10 boxes
- c) 5 boxes
- d) 6 boxes

3) The Oak students decide to buy one box of chocolates between them.

Work out how much each person pays if:

- a) 2 students buy the box
- b) 4 students buy the box
- c) 5 students buy the box
