

Simplifying multiplication and division using multiples of 10

Task A: Simplifying multiplication using multiples of 10

- 1) Use a Gattegno chart to write down at least 4 pairs of numbers with a product of the following:

- a) 5 e.g. 1×5 , 10×0.5 , 0.1×50 , 100×0.05
 b) 15 e.g. 3×5 , 30×0.5 , 0.3×50 , 300×0.05
 c) 180 e.g. 20×9 , 0.03×6000 , 0.2×900 , 3000×0.06
 d) 1600 e.g. 2×800 , 0.4×4000 , 0.8×2000 , 40×40

- 2) Go beyond the Gattegno chart and write down at least 3 pairs of numbers with a product of the following:

- a) 42 e.g. 0.006×7000 , 210×0.2 , $0.001 \times 42\ 000$, 2.1×20
 b) 300 e.g. 30×10 , $0.0015 \times 200\ 000$, $0.01 \times 30\ 000$, 600×0.5
 c) 8100 e.g. $900\ 000 \times 0.009$, $81\ 000 \times 0.1$, 300×0.27 , $162\ 000 \times 0.05$

- 3) Some of the decimal points have fallen out of these calculations!

Using these facts: $32 \times 14 = 448$ and $241 \times 19 = 4579$

Put the decimal points in the correct place in the question to get the given products.

- a) $32 \times 14 = 4.48$ e.g. 3.2×1.4
 b) $32 \times 14 = 0.448$ 0.32×1.4
 c) $32 \times 14 = 44.8$ 32×1.4
 d) $241 \times 19 = 45.79$ 24.1×1.9
 e) $241 \times 19 = 457.9$ 24.1×19
 f) $241 \times 19 = 4.579$ 2.41×1.9

- 4) Write some alternatives to your answers in question 3.

Task B: Simplifying division using multiples of 10

Answer the following questions. Find and shade them in the grid to reveal a number.

Divide the number by 200. $380 \div 200 = 1.9$

1) $36\ 000 \div 120 = 300$

2) $4800 \div 240 = 20$

3) $600\ 000 \div 500 = 1200$

4) $4\ 500\ 000 \div 300\ 000 = 15$

5) $42\ 000\ 000 \div 6000 = 7000$

6) $96\ 000 \div 24\ 000 = 4$

7) $300\ 000 \div 6000 = 50$

8) $880\ 000 \div 8000 = 110$

300	20	1200	40	15	20	50	500	4	7000	300
200	30	15	150	7000	200	7000	150	15	200	110
110	7000	300	120	110	4	300	700	20	30	1200
120	700	50	500	20	150	15	40	7000	120	15
4	110	20	1100	300	1200	20	150	1200	50	4
