

Name: _____

Simplifying multiplication and division using multiples of 10

Task A: Simplifying multiplication using multiples of 10

1) Use a Gattegno chart to write down at least 4 pairs of numbers with a product of the following:

- a) 5
- b) 15
- c) 180
- d) 1600

2) Go beyond the Gattegno chart and write down at least 3 pairs of numbers with a product of the following:

- a) 42
- b) 300
- c) 8100

3) Some of the decimal points have fallen out of these calculations!

Using these facts: $32 \times 14 = 448$ and $241 \times 19 = 4579$

Put the decimal points in the correct place in the question to get the given products.

- a) $32 \times 14 = 4.48$
- b) $32 \times 14 = 0.448$
- c) $32 \times 14 = 44.8$
- d) $241 \times 19 = 45.79$
- e) $241 \times 19 = 457.9$
- f) $241 \times 19 = 4.579$

4) Write some alternatives to your answers in question 3.

Task B: Simplifying division using multiples of 10

Answer the following questions. Find and shade them in the grid to reveal a number.
Divide the number by 200. $380 \div 200 = 1.9$

- 1) 36 000 ÷ 120

2) 4800 ÷ 240

3) 600 000 ÷ 500

4) 4 500 000 ÷ 300 000
- 5) 42 000 000 ÷ 6000

6) 96 000 ÷ 24 000

7) 300 000 ÷ 6000

8) 880 000 ÷ 8000

300	20	1200	40	15	20	50	500	4	7000	300
200	30	15	150	7000	200	7000	150	15	200	110
110	7000	300	120	110	4	300	700	20	30	1200
120	700	50	500	20	150	15	40	7000	120	15
4	110	20	1100	300	1200	20	150	1200	50	4
