

Dividing with decimals

Task A: Divisions written as fractions

1) Fill in the blanks so the fraction is equivalent to the calculation.

2) Work out the answer to the following. You must show your working out.

a) $46.2 \div 0.2 =$

b) $12.4 \div 0.4 =$

c) $4.2 \div 0.12 =$

3) Shade in all the equivalent fractions to
 $4.8 \div 0.4$
to reveal a word.

$\frac{12}{1}$	$\frac{4800}{40}$	$\frac{1.2}{0.1}$	$\frac{48}{40}$	$\frac{0.48}{0.04}$	$\frac{0.48}{0.4}$
$\frac{2.4}{0.2}$	$\frac{24}{0.02}$	$\frac{96}{8}$	$\frac{240}{0.02}$	$\frac{4.8}{4}$	$\frac{24}{0.02}$
$\frac{480}{40}$	$\frac{9.6}{0.8}$	$\frac{240}{20}$	$\frac{48}{0.04}$	$\frac{12}{1}$	$\frac{240}{0.02}$
$\frac{4.8}{0.4}$	$\frac{4.8}{4}$	$\frac{48}{4}$	$\frac{4.8}{0.04}$	$\frac{960}{80}$	$\frac{4.8}{4}$
$\frac{4.8}{0.4}$	$\frac{0.48}{0.4}$	$\frac{24}{2}$	$\frac{4.8}{4}$	$\frac{0.48}{0.04}$	$\frac{0.48}{0.4}$

Task B: Dividing using decimals

1) Show your working out for the following calculations.

a) $1.5 \div 2.4 = 0.625$

b) $4.2 \div 3.5 = 1.2$

c) $18.48 \div 2.2 = 8.4$

2) Use the numbers on the cards to complete the divisions. You may use each card only once.

Can you find more than one way this can be done?

520	130		÷		= 4
52	13		÷		= 0.4
5.2	1.3		÷		= 40
0.52	0.13		÷
