

Priority of operations with positive and negative integers and decimals

1 Using the priority of operations, work out: $20 - (-5) \times 10 =$ _____
Fill in the blank

2 Using the priority of operations, work out: $100 + (-50) \times 2 =$ _____
Fill in the blank

3 Using the priority of operations, work out the answer to $(-8) + 30 \div 2 =$ _____
Fill in the blank

4 Starting with the calculation with the lowest answer, put these calculations in order of size from lowest answer to highest answer. Use numbers to show the correct order

	$(-12) \div (-3) + 4^2$
	$10 - 3 \times 3$
	$\frac{200 + (-60)}{10 - (-10)}$
	$10 - (-4) \times 2$

5 Without using a calculator, evaluate $10 + (-9) \div (-3) - (-4)$ Fill in the blank

6 Without using a calculator, evaluate $9.4 - 3.2 + \frac{12^2}{\sqrt{75 + 25}}$ Fill in the blank
