

Using the associative, commutative and distributive laws together

1 Match each law with an example of the law Write the correct letter in each box

a	Commutative law
b	Associative law
c	Distributive law

a	$3 + 10 + 8 = 8 + 10 + 3$
b	$6 \times 5 \times 4 = (6 \times 5) \times 4$
c	$45 \times (0.7 + 0.3) = 45 \times 0.7 + 45 \times 0.3$

2 Which of the following is an example of the distributive law for this calculation 39×99 ? Tick 1 correct answer

- ☐ 99×39
- ☒ $39 \times (100 - 1)$
- ☐ $39 \times (9 \times 9)$

3 Which of the following is an example of the distributive law for this calculation: 22×42
Tick 2 correct answers

- ☒ $22 \times (40 + 2)$
- ☐ $22 \times (21 \times 2)$
- ☐ $22 \times (4 + 2)$
- ☒ $22 \times (10 + 10 + 10 + 10 + 2)$

4 Without using a calculator, use the distributive law to work out:

$4.8 \times 6.1 + 4.8 \times 3.9 = \underline{48}$ Fill in the blank

5 Work out the missing number: $5.67 \times 0.3 + 5.67 \times \underline{0.7} = 5.67$ Fill in the blank

6 Work out the missing number: $23 \times 0.8 + 23 \times 1.4 - 23 \times \underline{0.2} = 46$ Fill in the blank
