

Problem solving with integers and decimals

- 1 Laura has £23.21. She spends £12.45 and then spends £9.29. She then finds £2.89. Without using a calculator, work out how much money she has left. £ 4.36 Fill in the blank
- 2 Lucas has a £20 note. He needs to buy 6 packets of donuts for a party. Each packet costs £3.12. Work out how much change Lucas will have left. £ 1.28 Fill in the blank
- 3 Some children each grow a tomato plant. Alex's plant is 28.4 cm, Jacob's plant is 35.8 cm, Sofia's plant is 32.4 cm and Andeep's plant is 24.4 cm. Work out the mean height of the plants. 30.25 cm Fill in the blank
- 4 An isosceles triangle has one angle of 43.6° and another angle of 92.8° . Three students work out the third angle. Who is correct? Tick 1 correct answer
- ☒ Lucas: The last angle is 43.6°
- ☐ Jacob: The last angle is 92.6°
- ☐ Alex: The last angle is 223.6°
- 5 The starting line is at 0. If you twist this combination clock anticlockwise 50, which number will the combination lock starting line be on? Tick 1 correct answer

- ☒ 50
- ☐ -50
- ☐ 40
- ☐ -40

- 6 A combination lock starts at 0. It is twisted 23 anticlockwise, then 78 clockwise, then 80 anticlockwise and then 13 clockwise. Which number is the combination lock now indicating? 12 Fill in the blank
