

Problem solving with integers and decimals

- 1 Match each calculation to its correct answer. Use your knowledge of identifying a reasonable answer and do not work out the calculations. Write the correct letter in each box

a	$4.4 \times 7.4 =$
b	$2.9 \times 2.8 =$
c	$8.3 \times 3.1 =$
d	$5.7 \times 1.1 =$

d	6.27
c	25.73
a	32.56
b	8.12

- 2 Without using a calculator, work out the answer to $4 \times 8 + 6 \times 5 =$ 62 Fill in the blank

- 3 Match each number with its additive inverse. Write the correct letter in each box

a	81
b	(-3)
c	18
d	0.3
e	0.81

c	(-18)
a	(-81)
b	3
e	(-0.81)
d	(-0.3)

- 4 Starting with the calculation with the lowest answer, sort these calculations into order of size. Use numbers to show the correct order

2	$\frac{100 + (-40)}{5 - (-10)} + 1$
4	$(-12) \div (-3) + 2^2 + 1$
1	$11 - 4 \times 2 - 1$
3	$18 + (-6) \times 2 + 1$

- 5 Work out the missing number: $33 \times 0.6 + 33 \times \underline{0.4} = 33$ Fill in the blank
- 6 Work out the missing number: $4.5 \times 0.23 + 4.5 \times \underline{0.77} = 4.5$ Fill in the blank
