

Multiplication and division where two or more values are negative

Task A: Multiplying when two values are negative

1) Complete the number pyramids. Each brick is the product of the 2 bricks below it.

2) Create a pyramid with a base of 4 which has a positive number at the top.

Task B: Dividing when two values are negative

Fill in the missing integers in the times table grid

×	(-3)	4	(-5)	7	10	(-2)	(-6)	8
6	(-18)	24	(-30)	42	60	(-12)	(-36)	48
(-12)	36	(-48)	60	(-84)	(-120)	24	72	(-96)
2	(-6)	8	(-10)	14	20	(-4)	(-12)	16
(-11)	33	(-44)	55	(-77)	(-110)	22	66	(-88)
(-9)	27	(-36)	45	(-63)	(-90)	18	54	(-72)
3	(-9)	12	(-15)	21	30	(-6)	(-18)	24
5	(-15)	20	(-25)	35	50	(-10)	(-30)	40
(-4)	12	(-16)	20	(-28)	(-40)	8	24	(-32)

Task C: Multiplying and dividing with negative values

Here is a copy of Alex's homework.

Mark and correct any mistakes.

1) $(-2) \times 3 \times (-4) = (-24)$ ✗ 24

2) $4 \times (-5) \times 6 = (-120)$ ✓

3) $(-36) \div 6 \div (-3) \div (-2) = 1$ ✗ (-1)

4) $100 \div (-4) \div (-5) = 5$ ✓

5) $(-1) \times 6 \times 2 \times (-12) = 144$ ✓

6) $80 \div (-5) \div (-2) \div 4 = 2$ ✓

7) $(-3)^2 = (-9)$ ✗ 9

8) $(-2)^3 = 6$ ✗ (-8)

9) Make up some of your own questions with incorrect answers. Think about mistakes people might make.
