

Using the fx-CG50 for number and algebra

- 1 An equation is used to show 2 expressions that are equal to each other. (Fill in the blank)
- 2 Equations which represent different relationships between the same variables are called simultaneous equations. (Fill in the blank)
- 3 A quadratic is an equation, graph, or sequence whereby the highest exponent of the variable is 2. (Fill in the blank)
- 4 Equations can only be solved numerically. (Tick 1 correct answer)
 - ☐ True - you have to rearrange to make the variable the subject.
 - ☐ True - you have to factorise to solve.
 - ☐ False - equations can only be solved by guessing.
 - ☒ False - equations can be solved graphically.
- 5 Solve to find the value for a that satisfies $2a + 7 = 1$
-3
- 6 Solve to find the values of x that satisfy the equation $4x^2 + 20x + 21 = 0$ (Tick 2 correct answers)
 - ☒ $-\frac{3}{2}$
 - ☐ $-\frac{5}{2}$
 - ☒ $-\frac{7}{2}$
 - ☐ $-\frac{3}{4}$
 - ☐ $-\frac{5}{4}$
