

## Ordering fractions by converting

- The numerator is the expression in a fraction that is written above the fraction line. Fill in the blank
- The denominator is the expression in a fraction that is written below the fraction line. Fill in the blank
- Order the steps to show how to convert  $\frac{11}{20}$  to a decimal Use numbers to show the correct order

|   |                                    |
|---|------------------------------------|
| 1 | $\frac{11}{20} \times 1$           |
| 3 | $\frac{11 \times 5}{20 \times 5}$  |
| 5 | 0.55                               |
| 4 | $\frac{55}{100}$                   |
| 2 | $\frac{11}{20} \times \frac{5}{5}$ |

- In order to compare fractions and decimals, you must always convert them into the same form. Tick 1 correct answer

☐ True

☒ False

5 Order these values from smallest to largest. Use numbers to show the correct order

|   |                |
|---|----------------|
| 1 | 3.4            |
| 4 | 3.9            |
| 3 | $3\frac{3}{4}$ |
| 2 | $3\frac{1}{2}$ |

6 Order these values from smallest to largest. Use numbers to show the correct order

|   |                 |
|---|-----------------|
| 4 | 0.9375          |
| 3 | $\frac{23}{25}$ |
| 2 | $\frac{7}{8}$   |
| 1 | 0.85            |
