

Converting fractions to recurring decimals

Task A: Recognising recurring decimals

1) Match the correctly notated **recurring decimal** with the decimal form.

2) Using short division, identify the **recurring decimal** of the following fractions:

a) $\frac{1}{9} = 0.\dot{1}$

b) $\frac{5}{9} = 0.\dot{5}$

c) $\frac{1}{24} = 0.041\dot{6}$

3) Circle the fractions which are equivalent to a **recurring decimal**.

Task B: Using a calculator

1) Using a calculator, match the fraction to the equivalent decimal to the correct statement.

2) Match the correctly notated **recurring decimal** with the decimal form.

3) Write the following **recurring decimals** as a fraction.

a) $0.124\dot{5}$ $\frac{1121}{9000}$

b) $3.424\dot{8}$ $\frac{3853}{1125}$

c) $3.1\dot{4}$ $\frac{283}{90}$
