

Converting fractions with technology

Task A: Using a calculator to simplify fractions

1) Using your calculator, write the simplified fractions to:

a) $\frac{24}{40} = \frac{3}{5}$

b) $\frac{88}{120} = \frac{11}{15}$

c) $\frac{88}{40} = \frac{11}{5}$

d) $\frac{78}{1000} = \frac{39}{500}$

e) $\frac{2834}{5000} = \frac{1417}{2500}$

f) $\frac{95}{90} = \frac{19}{18}$

2) Using a calculator, work out the answers to the following giving your answer as a proper or improper fraction.

a) $\frac{3}{162} \times \frac{12}{33} = \frac{2}{297}$

b) $\frac{39}{20} \times 389 = \frac{15171}{20}$

3) Figure out the missing digits on the calculator screen to make the calculation correct.

a) 

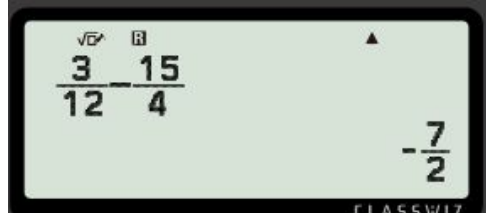

$$\frac{125}{35} = \frac{25}{7}$$

b) 

$$\frac{5}{25} \times \frac{92}{4} = \frac{23}{5}$$

c) 

$$\frac{24}{12} \times \frac{35}{4} = \frac{8}{35}$$

d) 

$$\frac{3}{12} - \frac{15}{4} = -\frac{7}{2}$$

Task B: Convert between fractions and decimals

1) Using your calculator, fill in the table below.

Decimal	Simplified fraction
0.982	$\frac{491}{500}$
2.384	$\frac{298}{125}$
$0.\dot{7}\dot{8}$	$\frac{26}{33}$
$6.\dot{5}$	$\frac{59}{9}$
$9.8\dot{7}\dot{1}$	$\frac{9773}{990}$

2) Find the missing values on the calculator displays.

a)

b)

c)

d)

Task C: Mixed numbers on a calculator

1) Fill in the table below.

Mixed number	Improper fraction	Decimal
$24\frac{3}{8}$	$\frac{195}{8}$	24.375
$4\frac{2}{9}$	$\frac{38}{9}$	4.222222...
$2\frac{12}{19}$	$\frac{50}{19}$	2.631578947

2) Work out the following calculations using your calculator. Give your answer as a mixed number.

$$\text{a) } 3\frac{2}{3} + 5\frac{1}{2} = 9\frac{1}{6} \quad \text{b) } 11\frac{3}{8} - 6\frac{7}{9} = 4\frac{43}{72}$$

$$\text{c) } 2\frac{3}{5} - 5\frac{9}{10} = -3\frac{3}{10} \quad \text{d) Create your own calculations where the answer is } 3\frac{1}{2}$$
