

Problem solving with constructions

- 1 This quadrilateral is a rhombus. Find the value of $a + b + c$.

- 2 This triangle is reflected with the line of reflection at its base side. The resultant quadrilateral is a rhombus. What is the area of this rhombus (in cm^2)?

- 3 This hexagon is regular. Find the size of angle v , in degrees. (Tick **1** correct answer)

- ☐ 15°
☐ 30°
☐ 45°
☐ 60°
☐ 90°

- 4 The triangle is equilateral, with two angle bisectors extending from the bottom two angles of the equilateral triangle and intersecting inside the triangle. Find the size of angle w . (Tick **1** correct answer)

- ☐ 120°
☐ 150°
☐ 210°
☐ 240°
☐ 300°

- 5 This diagram shows a kite enclosed by a rectangle. If the rectangle has an area of 780 cm^2 , find the area of the kite, in cm^2 .

- 6 This kite has an area of 270 cm^2 . What is the area of the shaded region: the right-angled triangle on the top, right of the kite? Give your answer in cm^2 .
