

Name: _____

Constructing rhombi

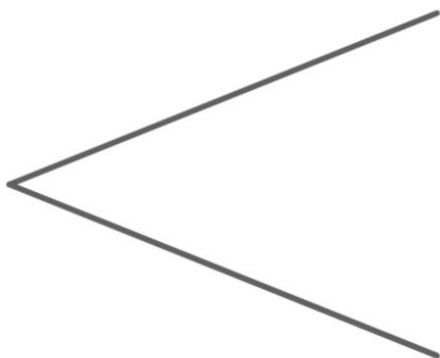

Task A: Creating shapes from triangles

1) By considering the properties of the quadrilateral, what types of triangles are they?

Task B: Constructing rhombi

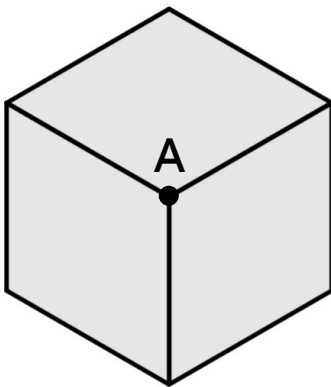

1) Finish constructing this rhombus, from the two given sides.

2) Construct three different rhombi, with side lengths 7 cm.
You will need to use a blank sheet of A4 paper for this task.

3) Construct a rhombus, with a 60° angle.

4) Construct this isometric cube, where each face is a rhombus.

Hint: The three rhombi are congruent, therefore the angles at the centre point (A) are all equal.
