

Truncating

1 _____ is the simplifying a number by 'cutting off' one or more of the digits and replacing them with zeros if necessary to preserve place value. Tick **1** correct answer

- ☐ Estimation
- ☐ Guessing
- ☐ Rounding
- ☒ Truncation

2 Match each number with its truncated value to 1 significant figure. Write the correct letter in each box

a	46 347 823
b	4634
c	46.347
d	46 347.823
e	4.634823

<i>a</i>	40 000 000
<i>d</i>	40 000
<i>e</i>	4
<i>c</i>	40
<i>b</i>	4000

3 Truncate 49.999999 to 3 significant figures. Select the correct response. Tick **1** correct answer

- ☐ Jun says, "The answer is 50.0".
- ☐ Andeep says, "The answer is 50.000".
- ☒ Laura says, "The answer is 49.9".
- ☐ Aisha says, "The answer is 50".

4 Jacob thinks of a number. Truncated to 1 s.f. Jun's number is 100. Jun's number is a multiple of 8 and it is 105 when rounded to the nearest 5. Fill in the blank

104

5 Match the appropriate treatment of the answer (exact, rounded to truncated) to each context. Write the correct letter in each box

a	Exact answer is required
b	Rounded answer is required
c	Truncated answer is required

c	You have £37 and want to buy as many £5 puzzle cubes as possible.
b	A meal is £37 and you share it between 5 people and want to give a tip
a	A length of wood 37 m needs to be cut into 5 equal strips.

6 In computer science, 'INT' or 'int' is used to truncate a number so to only give the integers. For example, $\text{INT}(56/10)$ has an output of 5. Match each computer instruction to its output. Write the correct letter in each box

a	$\text{INT}(78/8)$
b	$\text{INT}(90/8)$
c	$\text{INT}(123/10) + \text{INT}(7.9/3)$
d	$\text{INT}(789/10) + \text{INT}(56/3)$
e	$\text{INT}(1.65/10) + \text{INT}(76.6/3)$
f	$\text{INT}(8/0.5) + \text{INT}(12.65/2) - \text{INT}(9.8/6)$

f	21
c	14
a	9
e	25
b	11
d	96
