0.06408		0.064
0.0648		0.065

2) Round each number in the table to 3 decimal places.

Decimal	Number line	Answer
0.64848		0.648
0.64884		0.649
6.0648		6.065
6.08684		6.087

Task B: Rounding to three decimal places

1) Round each of the following to 3 decimal places and find them in the number search.

a) 0.4583 *0.458* h) 4.59289 *4.593*

b) 1.5737 *1.574* i) 5.9371 *5.937*

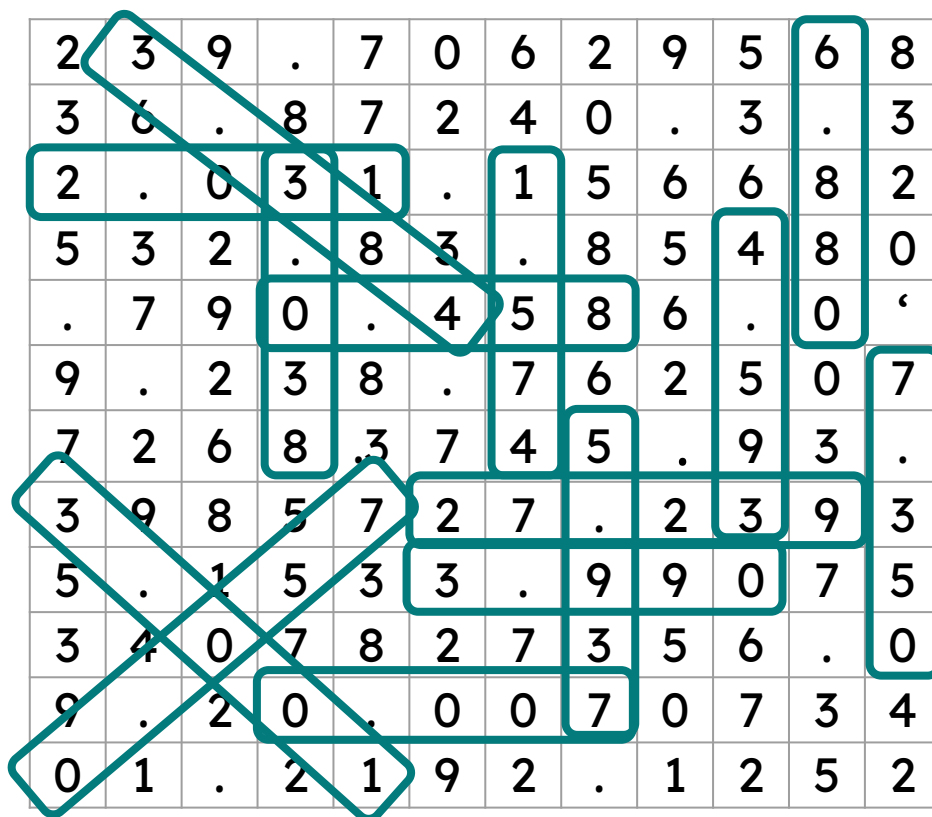

c) 3.0378 *3.038* j) 3.98972 *3.990*

d) 6.8796 *6.880* k) 3.3841 *3.384*

e) 2.0305 *2.031* l) 0.00692 *0.007*

f) 27.2389 *27.239* m) 7.3498 *7.350*

g) 0.05682 *0.057* n) 3.00149 *3.001*

2) Using the clues find the numbers being described:

a) Clue 1 – I have 4 digits.

Clue 2 – I am between $\frac{3}{4}$ and 1

Clue 2 – If you round me to 2 decimal places I round up.

Clue 3 – My tenths and thousandths digits are the same.

Clue 4 – My hundredths digit is a quarter of my tenths digit.

I am 0.828

b) Clue 1 – When rounded to 1 decimal place I am 6.8

Clue 2 – When rounded to 2 decimal places I round up.

Clue 3 – The sum of my 5 digits is 29

Clue 4 – My first digit is the same as my last digit.

Clue 5 – The digits in the tenths & hundredths columns are multiples of 4

I am 6.8456

c) Clue 1 – I am between $\frac{3}{10}$ and $\frac{2}{5}$.

Clue 2 – When rounding to 3 decimal places my thousandths digit stays the same.

Clue 3 – When rounded to 2 decimal places I am 0.32

Clue 4 – The sum of my 5 digits is 9

Clue 5 – I only have 1 odd digit.

Clue 6 – My largest digit is in the ten thousandths column.

I am 0.3204
