

Name: _____

Rounding to any number of decimal places

Task A: Rounding to a given number of decimal places

1) Complete the following table:

Number	to 1 d.p.	to 2 d.p.	to 3 d.p.
14.25342			
765.3246			
2035.83716			
7.658192			
82.82926			
0.63492			
0.08739			
0.2995			

2) Using the clues, find the numbers being described:

a) Clue 1 – I am between 2 and 3.

Clue 2 – I have 3 digits after the decimal point.

Clue 3 – When rounded to 2 decimal places I am 2.88.

Clue 4 – My hundredths digit is greater than my thousandths digit.

Clue 5 – The difference between my tenths and thousandths digits is 2.

I am _____

b) Clue 1 – I am between 1 and 2.

Clue 2 – I have 3 digits after the decimal point.

Clue 3 – When rounded to 1 decimal place I am 1.9.

Clue 4 – When rounded to 2 decimal places I am 1.90.

Clue 5 – The sum of my tenths and thousandths column is 13.

I am _____

2) Using the clues find the numbers being described:

c) Clue 1 – I am between 0 and 1.

Clue 2 – I have 3 digits after the decimal point.

Clue 3 – When rounded to 1 decimal place I am 0.1.

Clue 4 – When rounded to 2 decimal places I am 0.08.

Clue 5 – My hundredths column is double my thousandths column.

I am _____

Task B: Rounding in a context

1) 3 friends go out for lunch and spend £25. They decide that there are 3 different ways they can pay.

a) Write down the pros and cons of the different ways.

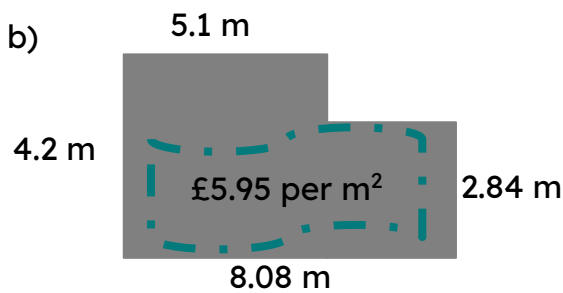

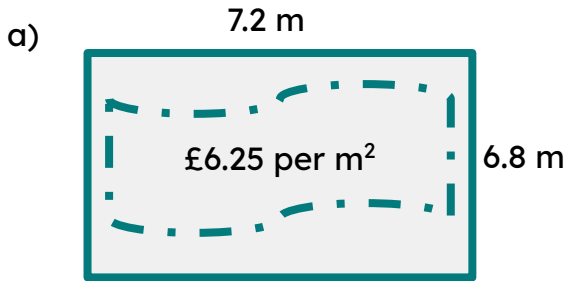

i) Round the cost to the nearest £10 and split the bill.

ii) Split the bill between the 3 of them, round this to the nearest pound and each pay that amount.

iii) Split the bill between the 3 of them, round to 2 decimal places and each pay that amount.

b) What should they do to pay for the lunch?

2) Work out the cost of carpeting the following:

3) Lucas, Aisha and Jacob take part in 800 m on sports day. The teacher recorded their times to the nearest minute.

Here are their times:

Lucas

Aisha

Jacob

3 minutes

3 minutes

3 minutes

a) Was rounding to the nearest minute a suitable degree of accuracy?

b) The teacher then decides to record their times to the nearest hundredth of a second. Is this an appropriate degree of accuracy?

Here are their exact times:

Lucas

Aisha

Jacob

00:03.08

00:03.20

00:02.58

c) Was it necessary to record the times to the nearest 100th of a second?
