

Checking and securing understanding of the distributive law with algebraic terms

1 What does the symbol $\equiv$ represent in the identity $x + x + x \equiv 3x$? Tick **1** correct answer

- ☐ There is a value for x which makes both sides equal.
- ☒ Both sides are equivalent expressions.
- ☐ The left hand side does not equal the right hand side.
- ☐ The identity can be solved to find the value of x

2 Which of these examples show two like terms? Tick **2** correct answers

- ☒ $2x$ and $0.4x$
- ☐ x^2 and x
- ☐ $5xy$ and $5y$
- ☒ $3xy$ and $3yx$
- ☐ $8x$ and 4

3 Which of these bar models represents 3 lots of the expression $2x + 1$? Tick **1** correct answer

☐
☒
☐
☐
