

Changing the subject to suit the context

- 1 For the linear equation $y = 5x - 7$, you can call y the _____ of the equation. Tick **1** correct answer

☐ gradient

☐ solution

☒ subject

- 2 Which of the below are correct rearrangements of the formula $V = a \times l$? Tick **3** correct answers

☒ $V = l \times a$

☐ $l = a \times V$

☒ $\frac{V}{l} = a$

☒ $\frac{V}{a} = l$

☐ $\frac{l}{V} = a$

- 3 Make y the subject of the equation $8y - 3x = 24$. Tick **2** correct answers

☐ $8y = 3x + 24$

☐ $y = \frac{3}{8}x + 24$

☒ $y = \frac{3}{8}x + 3$

☐ $y = 3x + 24 - 7y$

☒ $y = \frac{3x + 24}{8}$

4 Make e the subject of $\frac{c+d}{e} = f$. Tick **1** correct answer

☒ $\frac{c+d}{f} = e$

☐ $f(c+d) = e$

☐ $\frac{f}{c+d} = e$

☐ $e = cf + df$

5 Make d the subject of $\frac{c-d}{e} = f$. Tick **1** correct answer

☐ $\frac{c-f}{e} = d$

☒ $c - ef = d$

☐ $ef - c = d$

☐ $c + ef = d$

6 Make a the subject of $\frac{5}{a+b} = c$. Tick **1** correct answer

☐ $\frac{5}{c+b} = a$

☐ $\frac{5c}{b} = a$

☐ $5c - b = a$

☒ $\frac{5}{c} - b = a$

☐ $\frac{5}{c} + b = a$
