

The product of two binomials

Task A: Exploring the product of two binomials

1) Use the information given to fill in these area models and missing terms.

2) Use an area model to expand and simplify these products of two binomials.

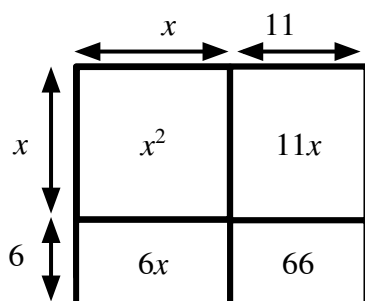

Task B: Multiplying binomials efficiently

1) Write each of these products of two binomials in expanded form.

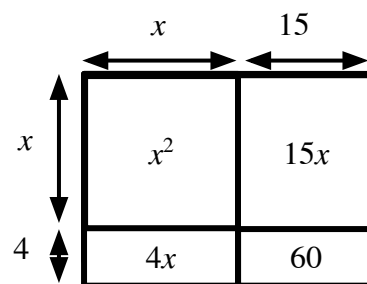

a) $(x + 6)(x + 11)$

$\equiv x^2 + 17x + 66$

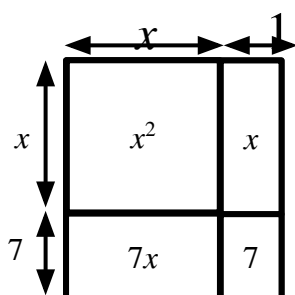

c) $(x + 4)(x + 15)$

$\equiv x^2 + 19x + 60$

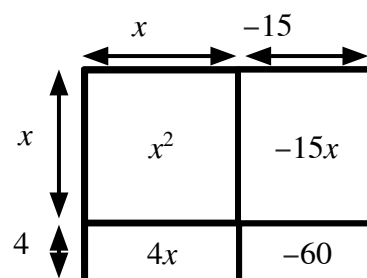

b) $(x + 7)(x + 1)$

$\equiv x^2 + 8x + 7$

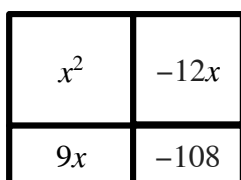

d) $(x + 4)(x - 15)$

$\equiv x^2 - 11x - 60$

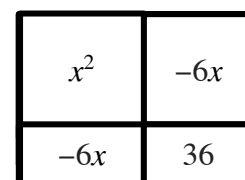

e) $(x + 9)(x - 12)$

$\equiv x^2 - 3x - 108$

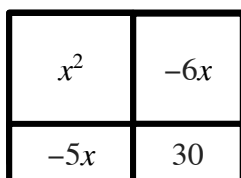

h) $(x - 6)^2$

$\equiv x^2 - 12x + 36$

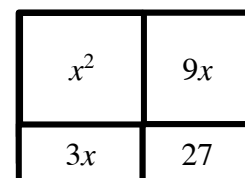

f) $(x - 5)(x - 6)$

$\equiv x^2 - 11x + 30$

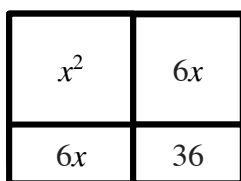

i) $(x + 3)(x + 9)$

$\equiv x^2 + 12x + 27$

g) $(x + 6)^2$

$\equiv x^2 + 12x + 36$

j) $(x - 3)(x - 8)$

$\equiv x^2 - 11x + 24$
