

Applying the criteria for congruence

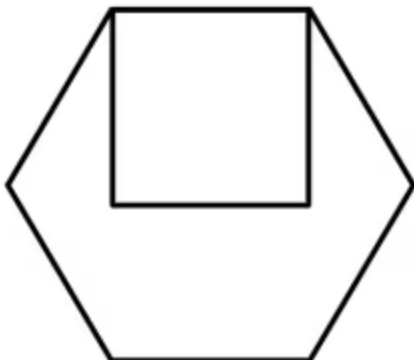

- 1 In triangle XYZ, angle m is 32°. Fill in the blank

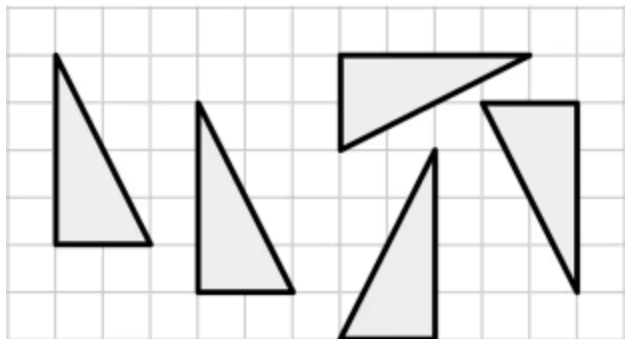

- 2 Select the right-angled triangles. (Diagrams are not drawn accurately) Tick **3** correct answers

☐

☒

☒

☒

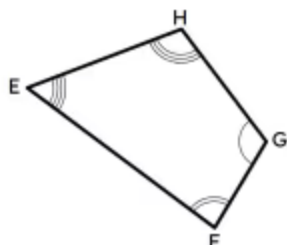

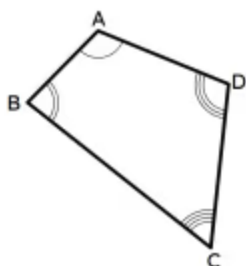

- 3 The square has a perimeter of 36 cm. The perimeter of the regular hexagon is 54 cm. Fill in the blank

- 4 All of these triangles are translations, rotations or reflections of each other. If they were cut out you could fit them exactly on top of each other. You can say the triangles are congruent. Fill in the blank

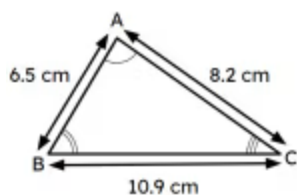

- 5 The quadrilaterals ABCD and EFGH are congruent and $AD = 6$ cm. Which edge on EFGH is also 6 cm? Tick **1** correct answer

- ☐ EF
☐ FG
☒ GH
☐ EH

- 6 Complete the statement. Triangle ABC and triangle XYZ are _____. Tick **1** correct answer

- ☐ congruent as the three interior angles are all the same.
☒ similar as the three interior angles are the same.
☐ neither similar nor congruent.
