

## Further demonstrating of Pythagoras' theorem

1 Which of these are square numbers? (Tick 2 correct answers)

☒ 16

☒ 1

☐ 3

☐ 8

2 Match each statement to its value. (Write the correct letter in each box)

|   |                      |
|---|----------------------|
| a | 7 squared            |
| b | the square of 8      |
| c | the square root of 9 |
| d | the square of 1      |
| e | root 16              |

|   |    |
|---|----|
| e | 4  |
| b | 64 |
| a | 49 |
| c | 3  |
| d | 1  |

3 The difference between  $10^2$  and  $6^2$  is 64. (Fill in the blank)

4  $9^2 + 6^2 - 4^2 = \underline{101}$ .

5 Starting with the smallest, place these angles in order of size. (Use numbers to show the correct order)

|   |                     |
|---|---------------------|
| 4 | straight line angle |
| 1 | zero degrees        |
| 3 | obtuse angle        |
| 5 | reflex angle        |
| 2 | acute angle         |

6 Which two of these are not square numbers? (Tick 2 correct answers)

☐ 64

☒ 55

☐ 16

☒ 12

☐ 81
