

Checking understanding of congruence

1 Match each transformation to its description. Write the correct letter in each box

a	enlargement
b	reflection
c	rotation
d	translation

	changing the size of an object while maintaining the same proportions
	turning an object by a fixed amount and around a fixed point
	moving every point of an object by the same distance and direction
	flipping an object over a fixed line

2 If one shape can fit exactly on top of another using rotation, reflection or translation, then the shapes are _____. Tick **1** correct answer

- ☐ alternate
- ☐ congruent
- ☐ corresponding
- ☐ supplementary

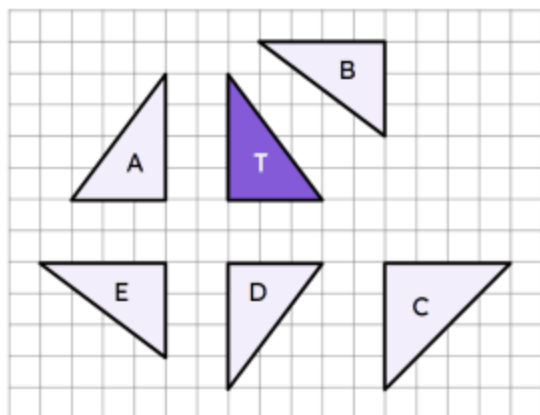

3 Which properties of a triangle would remain invariant when it is rotated 90° . Tick **2** correct answers

- ☐ The lengths of its edges.
- ☐ The orientation of the shape.
- ☐ The positions of its edges.
- ☐ The positions of its vertices.
- ☐ The size of its angles.

4 A square with length 5 cm is enlarged by a scale factor of 1. The length of square in the image is _____ cm. Fill in the blank

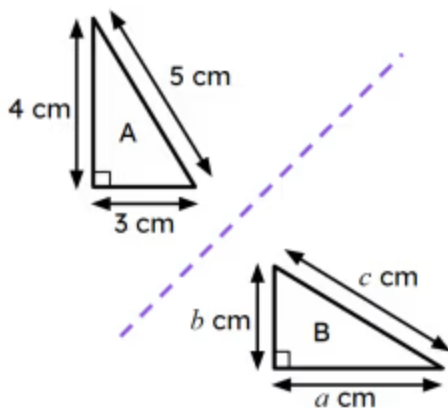

5 Which of the triangles can NOT be obtained by reflecting triangle T? Tick 1 correct answer

- ☐ A
- ☐ B
- ☐ C
- ☐ D
- ☐ E

6 Triangle A has been reflected over the line of reflection to create triangle B. Match each unknown length from triangle B with its size. Write the correct letter in each box

a	a cm
b	b cm
c	c cm

	5 cm
	3 cm
	4 cm
