

Similarity in shapes

1 When an object is enlarged by a scale factor of 2, the object and its image are _____. (Tick **1** correct answer)

- ☐ alternate
- ☐ congruent
- ☐ corresponding
- ☐ similar
- ☐ supplementary

2 A triangle is enlarged by a scale factor of 2. Which of the following measurements will remain invariant? (Tick **1** correct answer)

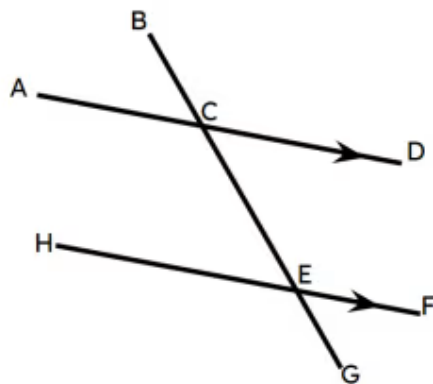

- ☐ the angles
- ☐ the length of its base
- ☐ the length of its height
- ☐ its perimeter

3 Which angles are always equal when found on figure containing parallel lines and a transversal? (Tick **2** correct answers)

- ☐ adjacent
- ☐ alternate
- ☐ co-interior
- ☐ corresponding

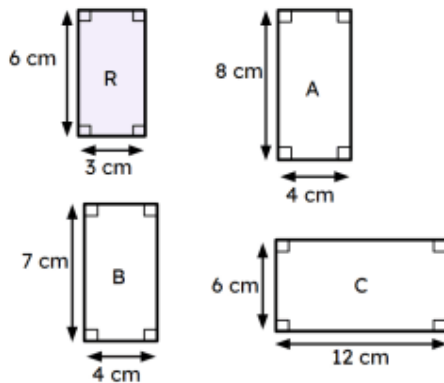

4 Which angle is corresponding with $\angle ECD$? (Tick 1 correct answer)

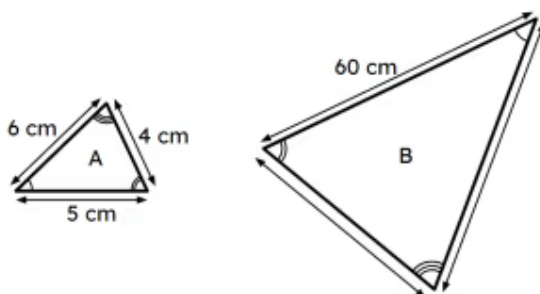

- ☐ $\angle ACE$
☐ $\angle CEH$
☐ $\angle FEC$
☐ $\angle GEF$

5 Which rectangle is not similar to rectangle R? (Tick 1 correct answer)

- ☐ A
☐ B
☐ C

6 Triangle B is an enlargement of triangle A. What is the scale factor? (Tick 1 correct answer)

- ☐ 10
☐ 12
☐ 15
