

Congruence in shapes

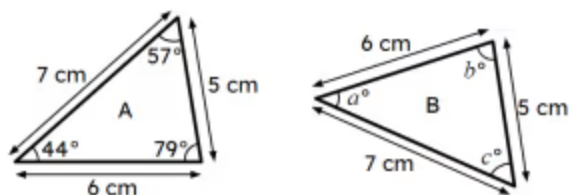

- 1 Triangles A and B are congruent. Match each unknown length from triangle B with its size. Write the correct letter in each box

a	a cm
b	b cm
c	c cm

a	4 cm
c	5 cm
b	6 cm

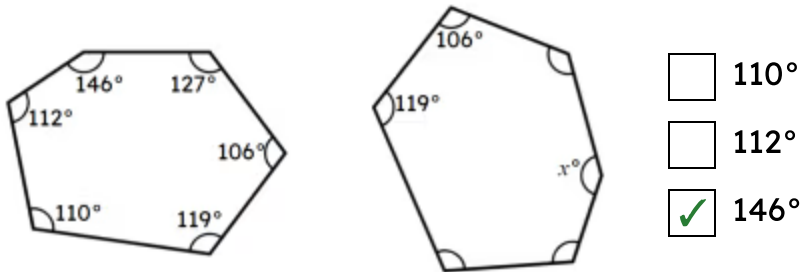

- 2 Triangles A and B are congruent. Match each unknown angle from triangle B with its size. Write the correct letter in each box

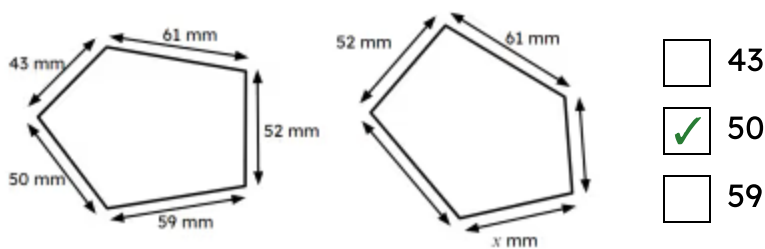

a	a°
b	b°
c	c°

c	57°
b	79°
a	44°

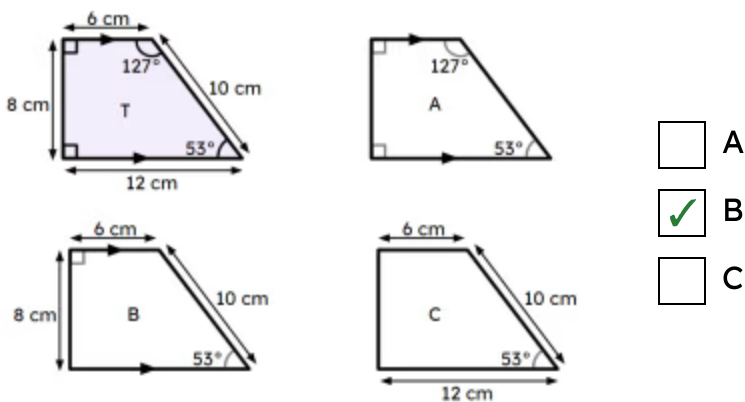

- 3 The image shows two congruent hexagons. What is the size of the angle x° ? Tick **1** correct answer

- 4 The image shows two congruent pentagons. What is the value of x ? Tick **1** correct answer

- 5 Shape T is a trapezium. Which quadrilateral contains enough information to determine whether it is congruent to shape T? Tick **1** correct answer

- 6 Shape R is a rhombus. Which quadrilateral is not congruent to shape R? Tick **1** correct answer
