

Name: _____

Rotational symmetry

Task A: Identifying rotational symmetry in shapes

1) Write down the order of **rotational symmetry** for each shape. Tracing paper may help you with this task.

2) Sort these letters into the table, according to their order of **rotational symmetry**.

A B C D E F G H I J K L M
N O P Q R S T U V W X Y Z

order 1	order 2	order 3	order 4	order greater than 4

Task B: Finding shapes with particular rotational symmetries

- 1) Aisha is designing a puzzle board for preschool children, where they place shapes into spaces on the board. She wants to arrange the spaces so that the shapes are in descending order of **rotational symmetry**.

Draw six shapes onto the board so that each shape has a lower order of **rotational symmetry** than the previous one.

- 2) Design and draw a custom logo with **rotational symmetry** of order 5.
Tracing paper and a protractor may be helpful during this task.
Alternatively, you may want to use computer software.
