

Congruent triangles (SSS)

- 1 In degrees, what is the size of the angle shown? Fill in the blank

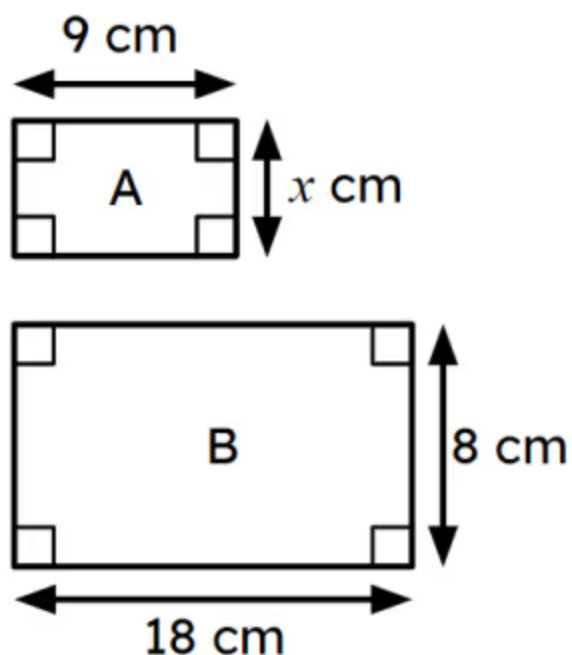

- 2 Select all the quadrilaterals that have at least one pair of equal sides. Tick **3** correct answers

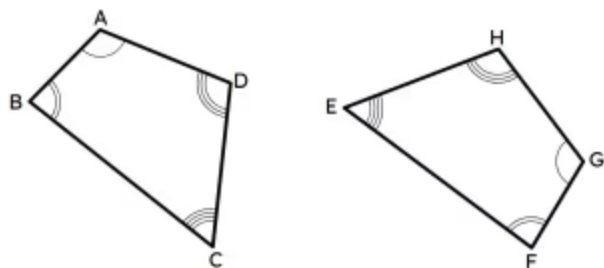

- ☐ Kite
- ☐ Square
- ☐ Trapezium
- ☐ Irregular quadrilateral
- ☐ Parallelogram

- 3 These two rectangles are similar. This means that the side marked x is _____ cm. Fill in the blank

- 4 Quadrilaterals ABCD and HEFG are congruent. Match each side or angle in quadrilateral ABCD with a corresponding edge or angle in quadrilateral HEFG. Write the correct letter in each box

a	AB
b	CD
c	BC
d	$\angle DCB$
e	$\angle ADC$
f	$\angle DAB$

	$\angle FEH$
	GF
	$\angle EHG$
	EF
	$\angle HGF$
	EH

- 5 A transformation has taken place on a shape. The image is congruent to the object. Which transformation cannot have taken place? Tick **1** correct answer

- ☐ translation
- ☐ reflection
- ☐ rotation
- ☐ enlargement ($SF \neq 1$)

- 6 Match each quadrilateral with another quadrilateral that could have the same interior angles. Write the correct letter in each box

a	Square
b	Parallelogram
c	Isosceles trapezium
d	Kite

	Rhombus
	Trapezium
	Rectangle
	Parallelogram
