

Efficiently drawing linear graphs

- 1 The relationship between two variables is _____ if, when plotted on a pair of axes, a straight line is formed. Fill in the blank
- 2 The minimum number of coordinates needed to plot the graph of a linear equation is _____. Fill in the blank
- 3 Aisha is plotting the graph of the line $y = 2x + 1$. She only wants to plot two points. The first point Aisha plots is (0, 1). Which of these points would be the best second point for Aisha to use? Tick **1** correct answer

- ☐ (0.1, 1.2)
- ☐ (0.5, 1.5)
- ☐ (3, 5)
- ☐ (5, 11)
- ☐ (1000, 2001)

- 4 Sam plots the graph of the linear equation $4x + 6y = 24$. When $x = 0$ then $y =$ _____. Fill in the blank
- 5 Match each pair of coordinates with the equation of the line that coordinates are on. Write the correct letter in each box

a	(2, 3)
b	(2, 4)
c	(2, 1)
d	(2, 5)
e	(2, 2)

	$y + 2x = 5$
	$2y + x = 6$
	$2y - x = 6$
	$y - 2x = 1$
	$x + y = 5$

- 6 Jacob wants to draw the graph of $y = 0.25x + 5.25$ for positive values of x . The coordinates of the first point on the line that has positive integer coordinates are _____. Fill in the blank
