

Reading from graphs

- 1 The relationship between two variables is linear if, when plotted on a pair of axes, a straight line is formed. Fill in the blank
- 2 What is the minimum number of coordinates needed to plot the graph of $y = 5x + 3$?
Tick **1** correct answer
- ☐ 1
- ☒ 2
- ☐ 3
- ☐ 4
- ☐ 5
- 3 Andeep plots the graph of the linear equation $4x + 6y = 24$. When $y = 0$ then $x = \underline{6}$.
Fill in the blank
- 4 Laura is plotting the graph of the line $3y + 5x = 15$. She only wants to plot two points. Which of these points would be the best points for Laura to use? Tick **2** correct answers
- ☒ When $x = 0$
- ☐ When $x = 1$
- ☐ When $x = 2$
- ☒ When $x = 3$
- ☐ When $x = 4$

- 5 Match each pair of coordinates with the equation of the line that coordinates are on. Write the correct letter in each box

a	(3, 0)
b	(3, 1)
c	(3, 2)
d	(3, 3)
e	(3, 4)

d	$y = x$
b	$3y = x$
e	$2y - 3x = -1$
c	$x + y = 5$
a	$y = 2x - 6$

- 6 Jun wants to draw the graph of $y = 0.2x + 2.2$ for positive values of x . The coordinates of the first point on the line that has positive integer coordinates are (4, 3). Fill in the blank
