

Modelling with graphs

- 1 The gradient is a measure of how steep a line is. Fill in the blank
- 2 The distance-time graph shows Sofia's journey to a friend's house. d is the distance in metres and t is the time in minutes. Which part of the journey is Sofia moving at the greatest speed? Tick **0** correct answers

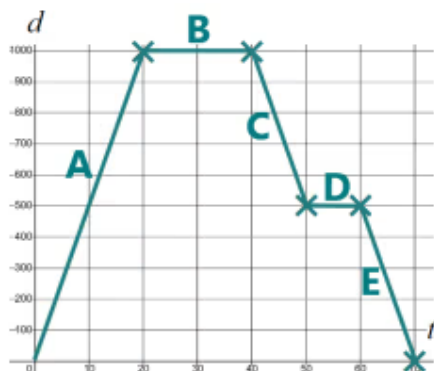

- ☐ Part a
- ☐ Part b
- ☐ Part c

- 3 The distance-time graph shows Andeep's journey to the shops. d is the distance in metres from Andeep's house and t is the time in minutes. Altogether Andeep's journey takes 70 minutes. Fill in the blank

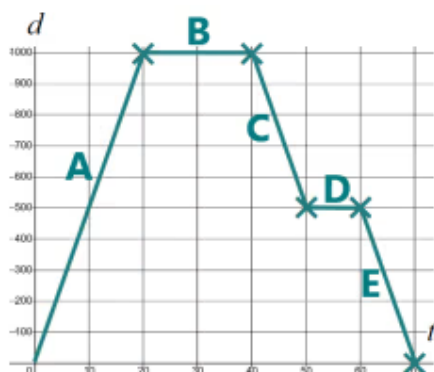

- 4 The distance-time graph shows Andeep's journey to the shops. d is the distance in metres and t is the time in minutes. Which segments show Andeep has stopped? Tick 2 correct answers

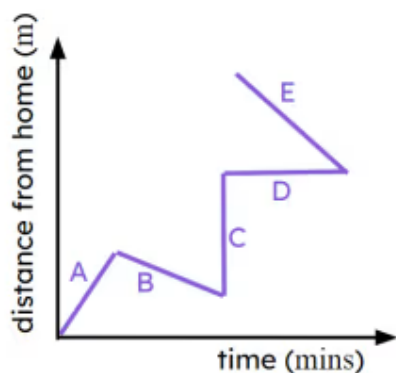

- ☐ A
☒ B
☐ C
☒ D
☐ E

- 5 The distance-time graph shows Andeep's journey to the shops. d is the distance in metres from Andeep's house and t is the time in minutes. Altogether Andeep has walked 2 kilometres. Fill in the blank

- 6 Izzy has drawn this distance-time graph. Which of these statements explain what is wrong with Izzy's graph. Tick **2** correct answers

- ☐ A There should not be any sections with a positive gradient.
- ☐ B There should not be any sections with a negative gradient.
- ☒ C There should not be any vertical sections.
- ☐ D There should not be any horizontal sections.
- ☒ E There should not be any sections where time goes backward.
