

Graphically solving two linear graphs that intersect

1 The graph of a _____ equation is a straight line. Tick **1** correct answer

- ☐ arithmetic
- ☒ linear
- ☐ quadratic
- ☐ variable

2 Which of these lines has the least steep gradient? Tick **1** correct answer

3 Use the graph of $y = 3x - 4$ to solve the equation $3x - 4 = 2$. The solution is $x = \underline{2}$.
Fill in the blank

- 4 Use the graph of $y = 7.4x + 12.95$ to estimate the value of $7.4 \times 4 + 12.95$. Tick **1** correct answer

- ☐ 28
- ☐ 33
- ☐ 38
- ☒ 43
- ☐ 48

- 5 Aisha is plotting the graph of the line $3y + 4x = 24$. She only wants to plot two points. Which of these points would be the best points for Aisha to use? Tick **2** correct answers

- ☒ When $x = 0$
- ☐ When $x = 2$
- ☐ When $x = 4$
- ☒ When $x = 6$
- ☐ When $x = 8$

- 6 Select the points which lie both on the line $y = 2x + 1$ and on the line $y = 3x - 2$. Tick **1** correct answer

- ☐ (1, 3)
- ☐ (4, 10)
- ☐ (0, -2)
- ☒ (3, 7)
- ☐ (2, 5)
