

Checking understanding of pictograms and bar charts

1 The frequency is the number of times an event occurs; or the number of individuals (people, animals etc.) with some specific property. Fill in the blank

2 Put the stages of a data investigation in order. Use numbers to show the correct order

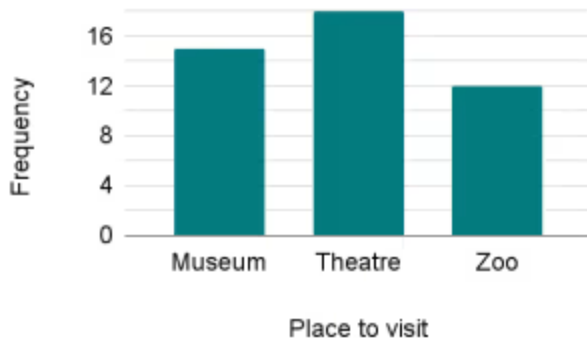

1	Plan the investigation
6	Decide on outcomes and actions
5	Make interpretations of the data
4	Analyse the data
2	Collect the data
3	Organise and present the data

3 Which pictogram matches this frequency table? Tick **1** correct answer

animal	frequency
lion	12
giraffe	5
elephant	9

4 Which table matches the bar chart? Tick **1** correct answer

☐

Place to visit	Frequency
Museum	15
Theatre	18
Zoo	13

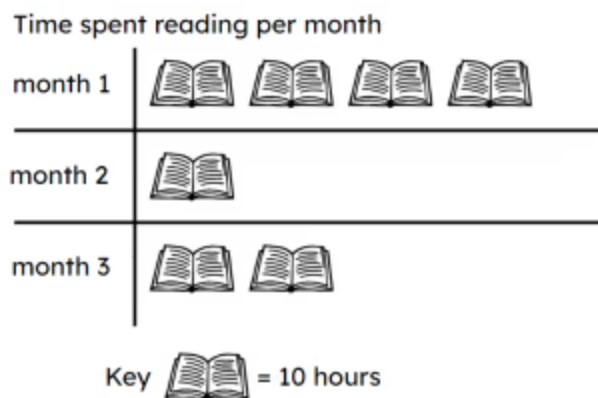

☒

Place to visit	Frequency
Museum	15
Theatre	18
Zoo	12

☐

Place to visit	Frequency
Museum	18
Theatre	15
Zoo	12

5 Which statements are true? Tick **3** correct answers

☒

The most time spent reading was in month 1.
