

Constructing bar charts by utilising technology

- 1 A bar graph is a graph consisting of bars visually representing the frequency of objects or groups.
- 2 What is the frequency of 'planet' according to this bar chart? (Tick 1 correct answer)

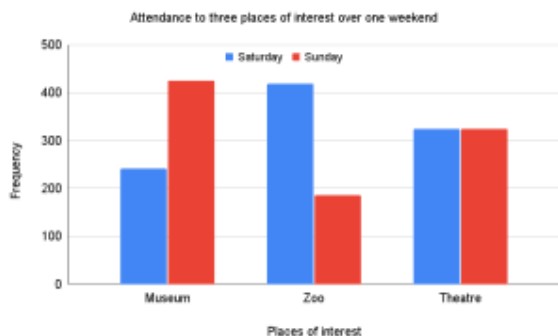

- 3 Starting with the least amount of time spent reading put the months in order from least to greatest. (Use numbers to show the correct order)

1	month 2
3	month 1
2	month 3

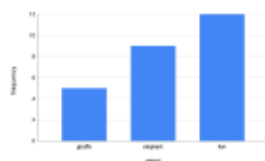

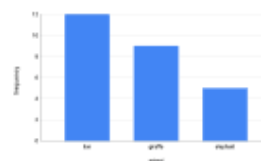

- 4 The theatre had the same amount of visitors on both Saturday and Sunday.

- 5 Which charts represent this data? (Tick 2 correct answers)

animal	frequency
lion	12
giraffe	5
elephant	9

☐

☒

☒

☐

- 6 Frequency is always found on the vertical axis of a bar chart. True or false? (Tick 1 correct answer)

☐

True - the categories are along the horizontal axis. e.g. food types

☒

False - bar charts can be horizontal rather than vertical
